Boiler water standards. Boiler water standard parameters

EXCEPTIONS: 1. Horizontal dispersion shall not be required in assembly areas with 300 or fewer seats if the companion seats required by F221.3 and wheelchair spaces are located within the 2nd or 3rd quartile of the total row length. Intermediate aisles shall be included in determining the total row length. If the row length in the 2nd and 3rd quartile of a row is insufficient to accommodate the required number of companion seats and wheelchair spaces, the additional companion seats and wheelchair spaces shall be permitted to be located in the 1st and 4th quartile of the row. F202.2.3 Toilet and Bathing Facilities are not provided in an addition but are provided in the existing building or facilities and bathing facilities shall comply with 603, altering existing toilet or bathing rooms is not required where a single unisex toilet room or bathing room complying with F213.2.1 is provided to serve the addition. Residential dwelling units required by F206. F233.3.2 Residential Dwelling Units with Communication Features Facilities on military installations, other than those containing emergency transportable housing units, shall comply with F233.3.2.1. Facilities on military installations containing Emergency Transportable Housing Units At least 2 percent, but no fewer than one, of the total number of residential dwelling units, other than emergency transportable housing units, in the facility shall provide communication features complying with 809.3. F233.3.2.2 Facilities Containing Emergency Transportable Housing Units Entities shall provide emergency transportable Housing Units Entities shall provide emergency transportable housing units with residential dwelling unit smoke alarms complying with 809.3.1 and, where weather alert systems are provided, with weather alert systems complying with 809.3.4 as determined by a needs assessment conducted by the entity providing the emergency transportable housing units. EXCEPTIONS: 1. In detention and correctional facilities, stairs that are not located in public use areas shall not be required to comply with 504. Accessible elements, spaces, and facilities provided within the trailhead. F223.1.1 Alterations Where sleeping rooms are altered or added, the requirements of F223 shall apply only to the sleeping rooms being altered or added, the requirements of F223 shall apply only to the sleeping rooms are altered or added, the requirements of F223 shall apply only to the sleeping rooms are altered or added, the requirements of F223 shall apply only to the sleeping rooms are altered or added until the number of sleeping rooms are altered or added. General. These requirements apply generally to newly designed and constructed amusement rides and attractions. A custom designed and constructed ride is new upon its first use, which is the first permanent installation of the ride, whether it is used off the shelf or modified before it is installed. Where amusement rides are moved after several seasons to another park, the ride would not be considered newly designed or newly constructed. We'll consider your request and get back to you in 5 working days. F215.5 Residential Dwelling Units. F247.5 Outdoor Constructed Features Where outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails, other than within facilities specified in F247.4, at least 20 percent, but not less than one, of each type of outdoor constructed features are provided on trails. features complying with 809.3 shall be provided in a number required by the applicable HUD regulations. Residential Dwelling Units Provided by HUD or Through Grant or Loan Programs Administered by HUD. Section F233.2 Residential Dwelling Units Provided by HUD or Through Grant or Loan Programs Administered by HUD. Section F233.2 Residential Dwelling Units Provided by HUD or Through Grant or Loan Programs Administered by HUD. requires that entities subject to HUD's regulations implementing Section 504 of the Rehabilitation Act of 1973, as amended, provide residential dwelling units containing mobility features and residential dwelling units and r Further, the residential dwelling units provided, unisex rooms are provided, unisex rooms are provided, unisex rooms are provided, at least 50 percent, but no fewer than one, of each type provided shall comply with 308. Advisory F247.1 General. The Federal Trail Data Standards classify trails by their designed use and managed use that determines the design, construction, and maintenance parameters for the trail. A trail can have more than one managed use based on a management decision to allow other uses on the trail. F238.2.3 Weather Shelters Where provided, weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided, weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where provided and constructed so that a golf car can enter and exit the weather shelters where the provided and exit the weather s of practice putting greens, practice teeing grounds, and teeing stations at driving ranges shall be designed and constructed so that a golf car can enter and exit the practice teeing grounds, and teeing stations at driving ranges shall be designed and constructed so that a golf car can enter and exit the practice teeing grounds, and teeing stations at driving ranges. F245.2.5.2 Parking Spaces Where provided, at least one parking space shall comply with 1012.3, 1012.4, and 1012.5. Where more than one parking space is provided, at least two parking spaces shall comply with 1012.3, 1012.4, and 1012.5. F245.3 Outdoor Constructed Features in Common Use and Public Use Areas Where provided in common use and public use areas that serve picnic units with mobility features, at least 20 percent, but not less than one, of each type of outdoor constructed feature provided at each location shall comply with 1011. F221.2.3.2 Vertical Dispersion Wheelchair spaces shall be dispersed vertically at varying distances from the screen, performance area, or playing field. In addition, wheelchair spaces shall be located in each balcony or mezzanine that is located on an accessible route. Advisory F244.5.3 Routes to Adjacent Recreation Facilities. F244.5.3 does not modify the accessible route requirements in F206 that apply to recreation facilities. F217 Telephones, public closed-circuit telephones, public courtesy phones, or other types of public telephones are provided, public telephones shall be provided in accordance with F217 for each type of public telephones shall be considered to be two or more adjacent telephones. F237 Fishing Piers and Platforms F237.1 General Fishing piers and platforms shall be considered to be two or more adjacent telephones. comply with 1005. 9. Grouping all ground level play components accessed by children with disabilities in one location access route complying with 1016 shall connect the following: 1. Residential dwelling units shall not be required to comply with F202.4. 2. Camping facilities, picnic facilities, picnic facilities, viewing areas, trailheads, trails, and beach access routes shall not be required to comply with F202.4. Advisory F202.4 Alterations Affecting Primary Function Areas. An area of a building or facility containing a major activity for which the building or facilities, viewing areas, trailheads, trails, and beach access routes shall not be required to comply with F202.4. Advisory F202.4 Alterations Affecting Primary Function Areas. can be multiple areas containing a primary function in a single building. Primary function areas are not limited to public use areas and walk-in safe are primary function areas. Also, mixed use facilities may include numerous primary function areas for each use. Areas containing a primary function do not include: mechanical rooms, boiler rooms, supply storage rooms, employee lounges or locker rooms, anitorial closets, entrances, corridors, or restrooms, and supply storage rooms, employee lounges or locker rooms, and supply storage rooms, employee lounges or locker rooms, anitorial closets, entrances, corridors, or restrooms, and supply storage rooms, employee lounges or locker rooms, and supply storage rooms, employee lounges or locker rooms, employee lounges or locker rooms, and supply storage rooms, employee lounges or locker rooms. elements required to be accessible. For example, not all medical care patient rooms are required to be accessible; those that are not required to be accessible are not required to be accessible are not required to be accessible are not required to be accessible. requirements and must be accessible. EXCEPTIONS: 1. In a building or facility permitted to use the exceptions to F206.2.3 or permitted by F206.7 to use a platform lift, elevators complying with 408 shall be permitted. F201.4.1 Documentation and Notification When Exceptions Used for Trails and Beach Access Routes Federal agencies shall document the basis for not fully complying with a specific provision in 1017 or 1018 on a portion of a trail or beach access route based on Exception 1 in 1017 or Exception 1 in 1018, and shall maintain the documentation with the records for the trail or beach project. Advisory F208.3.2 Residential Facilities Exception. Factors that could affect "user convenience" include, but are not limited to, protection from the weather, security, lighting, and comparative maintenance of the alternative parking site. F202.6 Leases Buildings or facilities for which new leases are negotiated by the Federal government after the effective date of the revised standards issued pursuant to the Architectural Barriers Act, including new leases for buildings or facilities previously occupied by the Federal government, shall comply with F202.6. EXCEPTIONS: 1. Buildings or facilities leased for use by officials servicing disasters on a temporary, emergency basis shall not be required to comply with F202.6. 2. Buildings or facilities leased for use by officials servicing disasters on a temporary, emergency basis shall not be required to comply with F202.6. 2. Buildings or facilities leased for use by officials servicing disasters on a temporary, emergency basis shall not be required to comply with F202.6. 2. Buildings or facilities leased for use by officials servicing disasters on a temporary, emergency basis shall not be required to comply with F202.6. 2. Buildings or facilities leased for use by officials servicing disasters on a temporary of the facilities leased for use by officials servicing disasters on a temporary of the facilities leased for use by officials servicing disasters on a temporary of the facilities leased for use by officials servicing disasters on a temporary of the facilities leased for use by officials servicing disasters on a temporary of the facilities leased for use by officials servicing disasters on a temporary of the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use by officials service and the facilities leased for use b not be required to comply with F202.6 provided that the lease may not be extended or renewed. F202.6.5.4 Dining Surfaces and Work Surfaces only one bathing facility is provided in the existing building or facility, one bathing facility shall comply with F213.2 and F213.3 and shall serve the addition. F235.2 Boat slips is not identified, each 40 feet (12 m) of boat slip edge provided along the perimeter of the pier shall be counted as one boat slip for the purpose of this section. F208.3 Location Parking facilities shall be located on the shortest accessible route from parking to an entrance complying with F206.4. Where parking serves more than one accessible entrances, parking spaces complying with 502 shall be dispersed and located on the shortest accessible entrances. In parking facilities that do not serve a particular building or facility, parking spaces complying with 502 shall be located on the shortest accessible route to an accessible pedestrian entrance of the parking facility. F206.2.6 Performance area to an assembly seating area with the performance area to an assembly seating area, an accessible route shall directly connect to an assembly seating area. ancillary areas or facilities used by performers unless exempted by F206.2.3 Exceptions 1 through 6. 3. F223.2.2 Facilities Specializing in treating conditions that affect mobility, 100 percent of the patient sleeping rooms shall provide mobility features complying with 805. F206.4.2 Parking Structure Entrances Where direct access to the building or facility entrance, each direct access to the building or facility entrance shall comply with 404. F202.2.5 Drinking Fountain Where a drinking fountain is not provided in an addition but is provided in the existing building or facility to serve the addition, at least one drinking fountain in the existing building or facility shall comply with 602.1 through 602.6. F202.3 Alterations Where existing elements or spaces are altered, each altered element or spaces are altered, each altered element or spaces are altered. provided, at least one shall comply with 611. Where more than three clothes dryers are provided, at least two shall comply with 611. 11. Advisory F247.3.2 Outdoor Recreation Access Routes. In alterations to existing trailheads, there are exceptions in 1016.1 that can be used where conditions specified in 1019 apply. F209.2 Type Where provided, passenger loading zones shall comply with F209.2. F209.2.1 Passenger Loading Zones Passenger loading zone complying with 503 in every continuous 100 linear feet (30 m) of loading zone space, or fraction thereof. F216.7 Elevators Where existing elevators do not comply with 407, elevators complying with 407 shall be clearly identified with the International Symbol of Accessibility complying with 603, directional signs indicating the location of the nearest toilet room or bathing room complying with 603 within the facility shall be provided. Signs shall comply with 703.7.2.1. Where existing toilet rooms or bathing rooms do not complying with 603, the toilet rooms or bathing rooms complying with 603 shall be identified by the International Symbol of Accessibility complying with 703.7.2.1. Where clustered single user toilet rooms or bathing facilities are permitted to use exception to F213.2, toilet rooms or bathing facilities complying with 703.7.2.1 unless all toilet rooms and bathing facilities comply with 603. F206.7 Platform Lifts shall be permitted as a component of an accessible route in an existing building or facility. F233.4.1.2.2 Group Sites Where group sites are developed for the installation of emergency transportable housing units, entities shall comply with F233.3.1.2.2. F233.4.1.2.2.1 Unit Pads At least 10 percent, but no fewer than one, of the unit pads prepared for the installation of emergency transportable housing units at each group site shall be designed and constructed to accept the installation of emergency transportable housing units with mobility features complying with 809.2 and shall be on an accessible route as required by F206. F217.4.3 Building, at least one public TTY shall be provided in a public use area. Where more than one tent pad and tent platform is provided, at least two tent pads and tent platforms shall comply with 1013. 2. Fuel dispensers provided for fueling official government vehicles shall not be required to comply with 1013. 2. Fuel dispensers provided for fueling official government vehicles shall not be required to comply with 309. F222.2 Coat Hooks and Shelves Where coat hooks or shelves are provided in dressing, fitting or locker rooms without individual compartments, at least one of each type shall comply with 803.5. Where coat hooks or shelves are provided in individual compartments at least one of each type complying with F222.1. F223 Medical Care and Long-Term

```
Care Facilities F223.1 General In licensed medical care facilities and licensed long-term care facilities where the period of stay exceeds twenty-four hours, patient or resident sleeping rooms shall be provided in accordance with F213. 3. Temporary, 7 days or less, signs shall not be required to comply with F216. F231.3.2 Court-Floor Holding Cells
Where separate court-floor holding cells are provided for adult male, juvenile male, act to court-floor holding cells are provided and are not separated by age or sex, courtrooms shall be served by at least one cell complying with 807.2.
Cells may serve more than one courtroom. F213.2.1 Unisex (Single-Use or Family) Toilet and Bathing Rooms Unisex toilet rooms shall contain not more than one shower or one shower and one bathtub, one lavatory, and one
 water closet. Doors to unisex toilet rooms and unisex bathing rooms shall have privacy latches. Advisory F232.2 General Holding Cells and General Holding categories, and holding classifications (e.g., male/female and adult/juvenile) to facilitate access
F202.6.5.8 Residential Dwelling Units Residential Dwelling Units Residential dwelling units, other than emergency transportable housing units, shall comply with F233. F221 Assembly Areas F221.1 General Assembly areas shall provide wheelchair spaces, companion seats, and designated aisle seats complying with F221 and 802. In addition, lawn seating shall comply with
F221.5. F221.2 Wheelchair Spaces Wheelchair Spaces with fixed seating. F204 Protruding Objects F204.1 General Protruding Objects on circulation paths shall comply with 307. F202.3.1 Prohibited Reduction in Access An alteration that decreases or has the effect of decreasing the
accessibility of a building or facility below the requirements for new construction at the time of the alteration is prohibited. Advisory F234.1 General Exception. Mobile or temporary rides are those set up for short periods of time such as traveling carnivals, State and county fairs, and festivals. The amusement rides that are covered by F234.1 are
ones that are not regularly assembled and disassembled. F202.5 Alterations to Qualified Historic Buildings and F202.4. EXCEPTION: Where the State Historic Preservation Officer or Advisory Council on Historic Preservation determines that compliance with
the requirements for accessible routes, entrances, or toilet facilities would threaten or destroy the historic significance of the buildings or facilities for that element shall be permitted to apply. Table F227.2 Check-Out Aisless Number of Check-Out Aisless Fach Function Minimum
Number of Check-Out Aislesof Each Function Required to Comply with 904.3 1 to 4 1 5 to 8 2 9 to 15 3 16 and over 3, plus 20 percent of additional aisles F227.2.1 Altered Check-Out Aisles Where check-out aisles are altered, at least one of each function shall comply with 904.3 until the number of check-out aisles complies.
with F227.2. F227.3 Counters Where provided, at least one of each type of sales counter shall comply with 904.4. Where counters are dispersed throughout the building or facility, counters complying with 904.4. Where counters are dispersed throughout the building or facility, counters where provided, at least one of each type of sales counter shall be dispersed. Advisory F246.2 Distinct Viewing Locations. Viewing areas can provide more than one distinct
viewing location. For example, a viewing area can provide a distinct viewing location for observing a mountain range, and another distinct viewing location for observing a river. Distinct viewing location for observing a mountain range, and another distinct viewing location for observing a mountain range, and another distinct viewing location for observing a river.
Passenger Loading Zones and Bus Stops F209.1 General Passenger loading zones shall be provided in accordance with F209. F206.2.2 Within a Site At least one accessible spaces that are on the same site. In facilities with residential dwelling units,
where mail boxes are provided for each residential dwelling unit, mail boxes complying with 309 shall be provided for each residential dwelling unit required to provided for each residential dwelling unit.
employees, at least one opening shall comply with 309. In accessible rooms or spaces, each glazed opening required by an administrative authority to be operable shall comply with 309. F209.3 Medical Care and Long-Term Care Facilities At least one passenger loading zone complying with 503 shall be provided at an accessible entrance to licensed
medical care and licensed long-term care facilities where the period of stay exceeds twenty-four hours. F233.4.1 and F233.4.2.1 shall apply only to the residential dwelling units that are added until the
total number of residential dwelling units comply with F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on an accessible route as required by F233.4.1.1 shall be on a required by F233.4.1.1 shall be on accessible route 
to the beach. Advisory F213.1 General. A pit toilet is a primitive outhouse consisting of a toilet riser over a hole dug into the ground or receptacle to receive and naturally decompose human waste. In addition, the exception at F203.2 provides that compliance with an earlier standard issued under Section 504 of the Rehabilitation Act satisfies the
requirements of the Architectural Barriers Act; the exception does not obviate or limit a Federal agency's authority to enforce requirements issued pursuant to Section 504 of the Rehabilitation Act, including reasonable modifications to policies, practices, and procedures, or making structural changes to facilities in order to
make a program or activity accessible to and usable by persons with disabilities. Advisory F244.5.4 Location. Where a vehicular way serves as the general circulation path for pedestrians at a camping facility, the outdoor recreation access route can be provided within the vehicular way. Advisory F248.2 Minimum Number Exception. Pedestrian
access points to a beach include parking facilities In transportation F217.4.7 Transportation Facilities, in addition to the requirements of F217.4.1 through F217.4.4, where at least one public pay telephone serves a particular entrance to a bus
or rail facility, at least one public TTY shall be provided to serve that entrance. In airports, in addition to the requirements of F217.4.1 through F217.4.1 through F217.4.4, where four or more public pay telephones are located in a terminal outside the security areas, a concourse within the security areas, or a baggage claim area in a terminal, at least one public TTY
shall be provided in each location. F245.2.1 Picnic Facilities with Two or Fewer Picnic Units Where picnic units, each picnic units, at least 20
percent, but not less than two, of the picnic units shall provide mobility features complying with F245.2. F245.2 shall apply only to the picnic units that are altered or added until the number of picnic units with mobility features complies with the minimum
number required in F245.2.1 or F245.2.2. EXCEPTION: Where an entity is implementing a transition plan for program accessibility developed pursuant to regulations issued under Section 504 of the Rehabilitation Act that designates specific picnic units to provide mobility features complying with F245.2.2. EXCEPTION: Where an entity is implementing a transition plan for program accessibility developed pursuant to regulations issued under Section 504 of the Rehabilitation Act that designates specific picnic units to provide mobility features complying with F245.2.2. EXCEPTION: Where an entity is implementing a transition plan for program accessibility developed pursuant to regulations issued under Section 504 of the Rehabilitation Act that designates are also accessible to the required to comply in the required to co
with F245.2 when altering individual elements within picnic units that are not designated to provide mobility features complying with F245.2. Advisory F245.2. Advisory F245.2. Advisory F245.2. Advisory F245.2. Advisory F245.2.
units with mobility features required in F245.2.1 or F245.2.2 is provided. Many detention and correctional facilities are designed so that certain areas (e.g., "shift" areas) can be adapted to serve as different types of housing according to need. For example, a shift area serving as a medium-security housing unit might be redesignated for a period of
time as a high-security housing unit to meet capacity needs. Placement of accessible cells or rooms in shift areas may allow additional flexibility in meeting requirements for dispersion of accessible cells or rooms. In emergency transportable housing units required to provide mobility features complying with 809.2, operable parts located beneath the
unit body shall not be required to comply with 309. F248.1.1 Facilities Serving Beaches Beach access routes shall be provided in a number complying with F248.2 where the entity that administers or manages a beach constructs or alters any of the following facilities to serve the beach: 1. Accessible parking spaces or other arrival points serving the
trailhead; 2. F211 Drinking Fountains F211.1 General Where drinking fountains are provided on an exterior site, on a floor, and within a secured area they shall be provided in accordance with F211. EXCEPTION: Fire alarms shall not be required to comply with 702 where existing power sources must be upgraded to meet the requirement. F212.3
Sinks Where sinks are provided, at least 5 percent, but no fewer than one, of each type provided in each accessible room or space shall comply with 606. F206.7.9 Team or Player Seating areas of sport activity. F202.6.5 Other Elements and Spaces
Where provided, the following elements and spaces shall comply with F202.6.5. F202.6.5. Prinking Fountains Drinking fountains by telephone is provided serving a hospital emergency room, hospital recovery room, or hospital waiting room, at least one public TTY shall be
provided at each location. F206.7.8 Play Areas Platform lifts shall be permitted to provide accessible routes to play components or soft contained play structures. F215.2 Public and Common Use Areas Alarms in public use areas and common use areas areas and common use areas areas
comply with F218. F244.5.2 Routes to and Within Common Use and Public Use Areas Common use and public use areas serving camping units with mobility features shall provide outdoor recreation access routes in accordance with F244.5.2. EXCEPTION: Outdoor recreation access routes in accordance with F244.5.2.
features and recreational vehicle dump stations where a pull-up space complying with 1012.2, 1012.4, and 1012.5 is provided at the dump station for recreational vehicle dump station for recreational vehicles. If you use assistive technology (such as a screen reader) and need a version of a PDF or other document on this page in a more accessible format, please get in touch via our online
form and tell us which format you need. EXCEPTION: Wheelchair spaces shall not be required in team or player seating piers and Platforms Fishing piers and Platforms shall be on an accessible route. Accessible route serving fishing piers and platforms shall
comply with Chapter 4 except as modified by 1005.1. F206.2.14 Golf Facilities At least one accessible route shall connect accessible routes serving golf car rental areas; bag drop areas; course weather shelters complying with F238.2.3; course toilet rooms; and
practice putting greens, practice teeing grounds, and teeing stations at driving ranges complying with F238.3 shall be permitted to be used for all or part of accessible routes required by F206.2.14. EXCEPTIONS: 1. Ground level play
components accessed by children with disabilities must be integrated into the play area. Designers should consider the optimal layout of ground level play components accessed by children with disabilities must be integrated into the play area. Designers should consider the optimal layout of ground level play components accessed by children with disabilities must be integrated into the play area. Designers should consider the optimal layout of ground level play components accessed by children with disabilities must be integrated into the play area.
Out Aisles Where more than one check-out aisle is provided, check-out aisles complying with 904.3 shall be identified by numbers, letters, or functions, signs identifying check-out aisles complying with 904.3 shall be located in the same
location as the check-out aisle identification. EXCEPTION: Self-service storage facilities not required to be on an accessible route. Advisory F223.2.2 Facilities Specializing in Treating Conditions That Affect Mobility. Conditions that affect mobility include conditions requiring the use or assistance of a
brace, cane, crutch, prosthetic device, wheelchair, or powered mobility aid; arthritic, neurological, or orthopedic conditions that severely limit one's ability to walk; respiratory diseases and other conditions that severely limit one's ability to walk; respiratory diseases and other conditions that severely limit one's ability to walk; respiratory diseases and other conditions which may provide
treatment for, but that do not specialize in treatment of such conditions, such as general rehabilitation hospitals, are not subject to this requirement but are subject to th
mobility features complying with 805. F203.11 Water Slides Water slides shall not be required by F202.6.5.2 and assistive listening systems required by F202.6.5.5 shall not be required to be on an accessible route. F233.4.2.2 Facilities Containing
Emergency Transportable Housing Units Entities shall provide emergency transportable housing units with residential dwelling unit smoke alarms complying with 809.3.1 and, where weather alert systems are provided, with weather alert systems are provided as a second system of the systems are provided as a second system of the systems are provided as a second system of the systems are provided as a second system of the systems are provided as a second system of the systems are provided as a second system of the systems are provided as a second system of the syste
emergency transportable housing units. Advisory F216.6 Entrances. Where a directional sign is required, it should be located to minimize backtracking. In some cases, this could mean locating a sign at the beginning of a route, not just at the inaccessible entrances to a building. F244.2.3 Elements Within Camping Units with Mobility Features
Elements within camping units required to provide mobility features shall comply with F244.2.3. F244.2.3.1 Outdoor Constructed Features where provided, at least one of each type of outdoor constructed features shall comply with 1011. EXCEPTION: An accessible route shall not be required between accessible buildings, accessible facilities,
accessible elements and accessible spaces if the only means of access between them is a vehicular way not providing pedestrian access. F203.4 Raised Areas Areas raised primarily for purposes of security, life safety, or fire safety, including but not limited to, observation or lookout galleries, prison guard towers, fire towers, or life guard stands shall
not be required to comply with these requirements or to be on an accessible route. F206.2.12 Exercise Machines and Equipment E
Permanent Structures. Temporary buildings or facilities covered by these requirements include, but are not limited to, reviewing stands, temporary banking facilities, and temporary health screening facilities. Structures and
equipment directly associated with the actual processes of constructed or Altered by or on Behalf of Federal Agencies The requirements in F216.13, F244 through F248, and 1011 through 1019 shall apply only to facilities constructed or Altered by or on Behalf of Federal Agencies The requirements in F216.13, F244 through F248, and 1011 through 1019 shall apply only to facilities constructed or Altered by or on Behalf of Federal Agencies The requirements in F216.13, F244 through F248, and 1011 through 1019 shall apply only to facilities constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered by or on Behalf of Federal Agencies The requirements apply to Facilities Constructed or Altered Barbara Agencies The requirements apply to Facilities Constructed or Altered Barbara Agencies The requirements apply to Facilities Constructed Or Altered Barbara Agencies The requirements apply to Facilities Constructed Or Altered Barbara Agencies The requirements apply to Facilities Constructed Or Altered Barbara Agencies The requirements apply to Facilities Constructed Or Altered Barbara Agencies The requirements apply to Facilities Constructed Or Altered Barbara Agencies The requirements apply to Facilities Constructed Or Altered Barbara Agencies The Requirements apply to Facilities Constructed Or Altered Barbara Agencies The Requirements apply to Facilities Constructed Or Altered Barbara Agencies The Re
altered by federal agencies or by non-federal entities on federal agencies pursuant to a concession contract, partnership agreement, or similar arrangement. F217.4.8 Detention and Correctional Facilities In detention and correctional facilities, where at least one pay telephone is provided in a secured area used only by
detainees or inmates and security personnel, at least one TTY shall be provided in at least one secured area. F202.6. EXCEPTION: Alterations and additions to joint use areas serving the leased space shall not be required to comply with F202.2, F202.3, and F202.5.
provided that the alterations are not undertaken by or on behalf of the Federal government. EXCEPTIONS: 1. Where a two story building or facility has one story with an occupant load of five or fewer persons that does not contain public use space, that story shall not be required to be connected to the story above or below. F212 Kitchens,
 Kitchenettes, and Sinks F212.1 General Where provided, kitchens, kitchenettes, and sinks shall comply with F212. Starting point of the trail; and 3. F206.2.7 Press Boxes Press boxes in assembly areas shall be on an accessible route. 2. An accessible route shall not be required between site arrival points and the building or facility entrance if the only areas shall be on an accessible route.
means of access between them is a vehicular way not providing pedestrian access. Advisory F232.1 General. Detention facilities include, but are not limited to, jails, detention centers, and holding cells in police stations. Correctional facilities include, but are not limited to, jails, detention centers, and correctional centers. Advisory F225.2.1 Lockers
Different types of lockers may include full-size and half-size lockers, as well as those specifically designed for storage of various sports equipment. F217.4.2 Floor Requirement Where at least one public TTY shall be provided on that floor. Advisory F206.2.1 Site Arrival Points. Each
site arrival point must be connected by an accessible route to the accessible routes must serve all of the accessible entrance or entrances, both bus stops must be on accessible routes. In addition, the accessible routes must serve all of the accessible
entrances on the site. Some amusement rides and attractions that have unique designs and features are not addressed by these requirements. In those situations, these requirements are to be applied to the extent possible. An example of an amusement ride and attractions that have unique designs and features are not addressed by these requirements. In those situations, these requirements are to be applied to the extent possible.
device does not move through a fixed course within a defined area. An accessible route must be provided to these rides. Where an attraction or ride has unique features for which there are no applicable scoping provisions, then a reasonable number, but at least one, of the features must be located on an accessible route. Where there are
appropriate technical provisions, they must be applied to the elements that are covered by the scoping provisions. F208.2.1 Hospital Outpatient facilities shall comply with 502. F203 General Exceptions F203.1 General Sites, buildings, facilities, and
elements are exempt from these requirements to the extent specified by F203. F230 Two-Way Communication Systems F230.1 General Where a two-way communication system is provided to gain admittance to a building or facility or to restricted areas within a building or facility, the system shall comply with 708. F245.2.4 Dispersion Picnic units
required to provide mobility features complying with F245.2 shall provide choices of picnic units comparable to, and integrated with, those available to others. F215.4 Transient Lodging Guest rooms required to comply with 810.3 and
810.4. F218.4 Other Transportation Facilities In other transportation facilities, public address systems shall comply with 810.7 and clocks shall comply with 810.8. F219 Assistive Listening Systems F219.1 General Assistive Listening Systems F219.1 General Assistive Listening Systems Shall comply with 810.8. F219 Assistive Listening Systems F219.1 General Assistive Li
with Mobility Features At least one outdoor recreation access route shall comply with F231.4. F231.4. Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with 902 on
both the visitor and detainee sides. Where counters are provided, at least one shall comply with 904.4.2 on both the visitor and detainee sides. F206.4.1 Public Entrances In addition to entrances required by F206.4.2 through F206.4.3 through F206.4.2 through F206.4.2 through F206.4.2 through F206.4.3 through F2
trail, only the name of the trail is required to comply with 703.5. See F216.2. Tactile characters are not required on exterior signs. F233.4.3 Residential Dwelling Units for Sale Residential Dwelling Units for
Rehabilitation Act of 1973, as amended. Advisory F208.2.2 Rehabilitation Facilities and Outpatient Physical Therapy Facilities. Conditions that severely
limit one's ability to walk; respiratory diseases and other conditions which may require the use of portable oxygen; and cardiac conditions that impose significant functional limitations. F219.3 Receivers complying with 706.2 shall be provided for assistive listening systems in each assembly area in accordance with Table F219.3. Twenty-five
percent minimum of receivers provided, but no fewer than two, shall be hearing-aid compatible in accordance with 706.3. EXCEPTIONS: 1. F203.10 Raised Refereeing, judging, and Scoring Areas Raised structures used solely for refereeing, judging, or scoring a sport shall not be required to comply with these requirements or to be on an accessible
route. F213.3.3 Urinals Where more than one urinal is provided, at least 20 percent, but not less than one, of each type of outdoor constructed feature shall comply with 1011. F232.4 Medical Care Facilities Patient bedrooms or cells required
to comply with F232 shall be provided in addition to any medical isolation cells required to comply with F232.5. F232.5. Visiting Areas Visiting Areas Visiting areas shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles shall comply with F232.5. F232.5.1 Cubicles and Counters At least 5 percent, but no fewer than one, of cubicles and cubicles are cubicles are cubicles and cubicles are cubicle
provided, at least one shall comply with 904.4.2 on both the visitor and detainee or inmate sides. F213.2 Toilet Rooms are provided, each bathing Rooms. These
requirements allow the use of unisex (or single-user) toilet rooms in alterations when technical infeasibility can be demonstrated. Unisex toilet rooms in addition to accessible single-sex toilet rooms in new facilities. Where the
minimum number of guest rooms required to comply with 806 is not sufficient to allow for complete dispersion, guest room shall be dispersed in the following priority: guest room type, number of beds, and amenities. At least one guest room required to provide mobility features complying with 806.2 shall also provide communication features
complying with 806.3. Not more than 10 percent of guest rooms required to provide mobility features complying with 806.3. Advisory F224.5 Dispersion. Factors to be considered in providing an equivalent range of options
may include, but are not limited to, room size, bed size, cost, view, bathroom fixtures such as hot tubs and spas, smoking and nonsmoking, and the number of rooms provided in accordance with Table F208.2 except as required by F208.2.1, F208.2.2, and F208.2.3.
Where more than one parking facility is provided on a site, the number of accessible spaces provided on the site shall be calculated according to the number of spaces required for each parking facility. Residential dwelling units
covered by Section F233.3 must comply with the technical and scoping requirements in Chapters 1 through 10 included this document. Advisory F203.2 Existing Elements. The exception at F203.2 does not obviate or limit in any way a federal agency's obligation to provide reasonable accommodations pursuant to the Rehabilitation Act of 1973.
Federal employees with disabilities are entitled to reasonable accommodations in the workplace. Such accommodations are always provided on a case-by-case
basis and are specific to the unique needs of a person. As such, an accommodation may be consistent with, or depart from, the specific technical requirements of this, or any other, document. Where more than one camp shelter is provided, at least two camp shelter is provided, at least two camp shelter shall comply with 1014. F245.4.1 Routes Within Picnic Units with Mobility Features
necessary for the installation, an accessible route shall be provided between the levels served by the escalator or stair unless exempted by F206.2.3 Exceptions 1 through 6. F203.2 Existing Elements in compliance with an earlier standard issued pursuant to the Architectural Barriers Act or Section 504 of the Rehabilitation Act of 1973, as
 amended shall not be required to comply with these requirements unless altered. EXCEPTIONS: 1. Drive-up only depositories shall not be required to comply with 309. Advisory F247.4.4. Routes, pictoilets, and accessible elements provided
within the facilities are not required to comply with 1017. 2. In detention and correctional facilities, an accessible route shall not be required to comply with 807.2, all common use areas serving cells with mobility features required to comply with 807.2, and all public use areas are on an
accessible route. Or fraction thereof F220 Automatic Teller Machines are provided, at least one of each type provided at each location shall comply with 707. Where bins are provided for envelopes, waste paper, or
other purposes, at least one of each type shall common Use and Public Use Areas At least one outdoor recreation access route shall common Use and public use areas serving picnic units with mobility features. 3. Where multiple single user
portable toilet or bathing units are clustered at a single location, no more than 5 percent of the toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603. Portable toilet units and bathing units at each cluster shall be required to comply with 603.
 user toilet rooms are clustered at a single location, no more than 50 percent of the single user toilet rooms for each use at each cluster shall be required to comply with 603. Advisory F206.7.9 Team or Player seating areas serving an area of sport
story. In addition, accessible routes shall not be required to connect stories or mezzanines where multi-story buildings or facilities are exempted by F206.2.3 Exceptions 1 through 6. F244.2.2 Dispersion Camping units required to provide mobility features complying with F244.2 shall provide choices of camping units comparable to, and integrated
with, those available to others. EXCEPTION: Where saunas or steam rooms, but no fewer than one, of each type in each cluster shall be required to comply with 612. F247 Trails F247.1 General Where a trail is designed for use by hikers or pedestrians and
dispersed among the various types of residential dwelling units in the facility and shall provide choices of residential dwelling units comparable to, and integrated with, those available to other residents. EXCEPTION: TTYs shall not be required at banks of telephones located within 200 feet (61 m) of, and on the same floor as, a bank containing and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units in the facility and shall provide choices of residential dwelling units are shall be added to the facility and shall provide choices of residential dwelling units are shall be added to the facility and shall provide choices of residential dwelling units are shall be added to the facility and shall provide choices of residential dwelling units are shall be added to the facility and shall provide choices of residential dwelling units are shall be added to the facility and 
public TTY. Advisory F206.7.5 Existing Site Constraints. This exception applies where topography or other similar existing site constraints necessitate the use of a platform lift as the only feasible alternative. While the site constraints necessitate the use of a platform lift as the only feasible alternative. While the site constraints necessitate the use of a platform lift as the only feasible alternative.
Facilities In transient lodging facilities, entrances, doors, and doorways providing user passage into and within guest rooms that are not required to provide mobility features complying with 806.2 shall comply with 806.2 
shall not be required to comply with 404.2.3. F206.5.4 Residential Dwelling Units. F247.3 Trailheads Trailheads Irrailheads Trailheads Trailheads Trailheads Trailheads Irrailheads Trailheads Trailheads Trailheads Trailheads Trailheads Irrailheads Irrailheads
Where more than one of the same type of outdoor constructed feature is provided, at least two of the same type of outdoor constructed features where emergency transportable housing units are installed on existing commercial sites, entities shall
provide emergency transportable housing units with mobility features complying with 809.2 as determined by a needs assessment conducted by the emergency transportable housing units. Advisory F210.1 General. Although these requirements do not mandate handrails on stairs that are not part of a means of egress, State or
local building codes may require handrails or guards. Five percent, but not less than one, of permanently installed work surfaces include, but are not limited to, laboratory and work benches, fume hoods, reception counters, teller windows, study carrels, commercial kitchen
counters, writing surfaces, and fixed conference tables. Where furnishings are not fixed, Sections 501, 503, and 504 of the Rehabilitation Act of 1973, as amended provides that Federal employees, employees of Federal contractors, and certain other employees, are entitled to "reasonable accommodations." This means that employees may need to
procure or adjust furnishings to accommodate the individual needs of employees with disabilities on an "as needed" basis. Consider work surfaces that are flexible and permit installation at variable heights and clearances. F233.3.1.2 Facilities Containing Emergency Transportable Housing Units Entities shall provide emergency transportable housing
units with mobility features complying with 809.2 as determined by a needs assessment conducted by the emergency transportable housing or Wrestling Rings Raised boxing or wrestling rings shall not be required to comply with these requirements or to be on an accessible route. EXCEPTION
Where all check-out aisles serving a single function comply with 904.3, signs complying with 703.7.2.1 shall not be required. F238.2.2 Putting green. F213.3.5 Mirrors Where mirrors are provided, at least one shall comply with 603.3. F213.3.6
Bathing Facilities Where bathtubs or showers are provided, at least one bathtub complying with 607 or at least one public telephone is not provided in the existing building or facility to serve the addition, at least one public telephone in the
existing building or facility shall comply with F217. 2. An accessible route shall not be required to free-standing press boxes that are elevated above grade 12 feet (3660 mm) minimum provided that the aggregate area of all press boxes that are elevated above grade 12 feet (46 m2) maximum. Advisory F245.4.4 Location. Where a vehicular way serves as the general
circulation path for pedestrians at a picnic facility, the outdoor recreation access route can be provided within the vehicular way. F232.2 General Holding Cells and General Housing Cells General Housing Cells and General Housing Cells General Housing Cells and General Housing Cells and General Housing Cells and General Housing Cells 
except to the extent determined by regulations issued by the appropriate Federal agency having authority under Section 504 of the Rehabilitation Act of 1973. Advisory F245.1 General. Picnic facilities on trails are addressed in F247.4.2. F245.2 Picnic Units with Mobility Features Picnic facilities shall provide picnic units with mobility features in
accordance with F245.2. Advisory F245.2 Picnic Units with Mobility Features on websites, in brochures, and at bulletin boards or information kiosks at the picnic facility. 2. In sports
facilities, tiered dining areas providing seating required to comply with F221 and each tier is provided with the same services. F233.4.1.2.2.2 Units Installed At least 5 percent, but no fewer than
one, of the total number of the emergency transportable housing units installed at each group site shall provide mobility features complying with 809.2. F233.4.2 Residential Dwelling Units with F233.4.2.1. Facilities containing
emergency transportable housing units shall comply with F233.4.2.1 Facilities Other Than Those Containing Emergency Transportable Housing units, other than emergency transportable housing units, in the facility shall provide communication
features complying with 809.3. EXCEPTION: Where facilities contain 15 or fewer residential dwelling units, the requirements of F233.4.2.1 shall apply to the total number of residential dwelling units that are constructed under a single contract, or are developed as a whole, whether or not located on a common site. F233.3.5 Dispersion Residential
dwelling units required to provide mobility features complying with 809.2 and residential dwelling units required to provide communication features complying with 809.3 shall be dispersed among the various types of residential dwelling units in the facility and shall provide choices of residential dwelling units comparable to, and integrated with,
those available to other residents. Advisory F202.3 Alterations. Although covered entities are permitted to limit the scope of an alteration to individual elements within a room or space accessible. Any elements or spaces of the building or
facility that are required to comply with these requirements must be made accessible within the scope of the alteration, to the maximum extent feasible. If providing accessibility in compliance with these requirements for people with one type of disability (e.g., people who use wheelchairs) is not feasible, accessibility must still be provided in
compliance with the requirements for people with other types of disabilities (e.g., people who have vision impairments) to the extent that such accessibility is feasible. Advisory F206.2.3 Multi-Story Buildings and Facilities Exception 3. Where common use areas are provided for the use of residents, it is presumed
that all such common use areas "serve" accessible dwelling units unless use is restricted to residents occupying certain dwelling units. Where provided in residential dwelling units required to provide communication features
complying with 809.3, alarms shall comply with 702. F227.2 Check-Out aisles where check-out aisles complying with 904.3 shall be provided in accordance with Table F227.2. Where check-out aisles complying with 904.3 shall be provided in accordance with Table F227.2 for
each function. Where check-out aisles are dispersed throughout the building or facility, check-out aisles and Service Counters Sales and Service counters shall coincide with or be
located in the same area as general circulation paths. EXCEPTIONS: 1. Unless required by F202.4, where elements or space is not altered and the circulation path to the altered and the circulation paths. EXCEPTIONS: 1. Unless required by F202.4, where elements or space is not altered, an accessible route shall not be required. F203.8 Detention and Correctional Facilities In detention and correctional facilities.
areas that are used only by inmates or detainees and security personnel and that do not serve holding cells or housing cells required to comply with these required to comply with the complex to the com
where conditions specified in 1019 apply. EXCEPTIONS 1: Where multi-story residential dwelling units are one of the types of residential dwelling units where equivalent spaces and amenities are provided in the one-story
residential dwelling unit. F233.4.5.1 Alterations to Vacated Buildings Where a building is vacated for the purposes of alteration, and the altered building units shall comply with 809.2 and shall be on an accessible route as required by F206. F225.2.1 Lockers
Where lockers are provided, at least 5 percent, but no fewer than one of each type, shall comply with 811. F203.9 Residential dwelling units required to provide mobility features complying with 809.2 or emergency transportable housing unit pads
designed and constructed to accept the installation of units with mobility features complying with these requirements or to be on an accessible route. Advisory F203.12 Animal Containment Areas. Public circulation routes where animals may travel, such as in petting zoos and passageways alongside animal
pens in State fairs, are not eligible for the exception. However, if the laundry room on the first floor, and the second floor, then first floor accessible units are "served" only by laundry rooms on the first floor. F206.4.4.2 Direct Connections Direct
connections to other facilities shall provide an accessible route complying with 404 from the point of connection system elements provided to facilitate future direct connections shall be on an accessible route connecting boarding platforms and all transportation
system elements required to be accessible. Similarly, there are many types of cardiovascular exercise and is considered a different type for purposes of these requirements. F208 Parking Spaces F208.1 General
Where parking spaces are provided, parking spaces shall be provided in accordance with F208. F226.2 Dispersion Dining surfaces and work surfaces. 2. Areas of refuge shall be dispersed throughout the space or facility containing dining surfaces and work surfaces.
facilities. Advisory F220.1 General. If a bank provides both interior and exterior ATMs, each such installation is considered a separate location. Accessible ATMs, including those with speech and those that are within reach of people who use wheelchairs, must provide all the functions provided to customers at that location at all times. For example
it is unacceptable for the accessible ATM only to provide cash withdrawals while inaccessible ATMs also sell theater tickets. F206.8 Security barriers Security barriers for the accessible route or accessible means of egress. F222 Dressing, Fitting, and
Locker Rooms F222.1 General Where dressing rooms, or locker rooms are provided, at least 5 percent, but no fewer than one, of each type of use in each cluster provided shall comply with 803. Advisory F213.3.1 Toilet Compartment is a partitioned space that is located within a toilet room, and that normally
contains no more than one water closet. A toilet compartment may also contain a lavatory. A lavatory is a sink provided for hand washing. Full-height partitions and door assemblies can compartment may also contain a lavatory is a sink provided for hand washing. Full-height partitions and door assemblies can compartment. In addition, Section F233.2 defers to HUD the
specification of criteria by which the technical requirements of this document will apply to alterations of existing facilities subject to HUD's Section 504 regulations. F203.12 Animal Containment areas that are not for public use shall not be required to comply with these requirements or to be on an accessible route
F202.6.5.10 Emergency Transportable Housing Units with Communication Features Where emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites, entities shall provide emergency transportable housing units are installed on existing commercial sites.
with weather alert systems complying with 809.3.4 as determined by a needs assessment conducted by the entity providing the emergency transportable housing units. F217.4.4 Exterior Site Requirement Where four or more public pay telephones are provided on an exterior site, at least one public TTY shall be provided on the site. Table F235.2 Boat
Slips Total Number of Boat Slips Provided in Facility Minimum Number of Required Accessible Boat Slips 1 to 25 1 26 to 50 2 51 to 100 3 101 to 150 4 151 to 300 5 301 to 400 6 401 to 500 7 501 to 600 8 601 to 700 9 701 to 800 10 801 to 100 3 101 to 150 4 151 to 300 5 301 to 400 6 401 to 500 7 501 to 100 3 101 to 150 4 151 to 300 5 301 to 400 6 401 to 500 7 501 to 100 3 101 to 150 4 151 to 300 5 301 to 400 6 401 to 500 7 501 to 500 
Slips. The requirement for boat slips also applies to piers where boat slips are not demarcated, the total length of boat slip edge (55 mm) wide (the minimum width specified by Section 1003.3) allows boats to moor on three sides. Because the number of boat slips is not demarcated, the total length of boat slip edge (55 mm) wide (the minimum width specified by Section 1003.3) allows boats to moor on three sides.
feet, 17 m) must be used to determine the number of boat slip provided (two). This number is based on the specification in Section F235.2 that each 40 feet (12 m) of boat slip to be accessible. Operable parts located within residential
dwelling units not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and transient lodging guest rooms not required to provide mobility features complying with 809.2 and 809.2
complying with 404 that is on an accessible route, the altered entrance shall not be required to comply with F206.4. Where no public entrance shall be required to comply with F206.4. Where no public entrance shall be required to comply with F206.4.
can comply with F206.4 under criteria established in F202.5 Exception, then either an unlocked entrance complying with F206.4; or a locked entrance complying with F206.4 with a notification system or remote monitoring shall be provided. F201.3 Temporary and Permanent Structures These requirements shall apply to
temporary and permanent buildings and facilities. F245.4.2 Routes to and Public Use Areas Common Use and Public Use Areas At least one outdoor recreation access routes in accordance with F245.4.2. Routes to Common Use and Public Use Areas At least one outdoor
recreation access route shall connect each picnic unit with mobility features with common use and public use areas serving that unit. Advisory F216.12 Amusement rides designed primarily for children, amusement rides designed primarily for children 
example, an accessible route is not required to the second floor provided that all accessible units and all common use areas serving them are on the first floor. Advisory F217.1 General. These requirements apply to all types of public telephones including courtesy phones at airports and rail stations that provide a free direct connection to hotels
transportation services, and tourist attractions. Advisory F222.1 General. A "cluster" is a group of rooms proximate to one another. Different styles of design provide users varying levels of privacy and convenience. Some designs include private changing facilities that are
close to core areas of the facility, while other designs use space more economically and provide only group dressing facilities. Regardless of the type of facility, dressing, fitting, and locker rooms should provide people with disabilities rooms that are equally private and convenient to those provided others. For example, in a physician's office, if people with disabilities rooms that are equally private and convenient to those provided others.
without disabilities must traverse the full length of the office suite in clothing other than their street clothes, it is acceptable for people with disabilities to be asked to do the same. F239.2 Minimum Number. Where possible, providing
access to all holes on a miniature golf course is recommended. If a course is designed with the minimum 50 percent accessible holes, designers or operators are encouraged to select holes which provide for an equivalent experience to the maximum extent possible. F206.2.16.2 Soft Contained Play Structures Where three or fewer entry points are
transportation vehicles, each bus bay, bus stop, or other area designated for lift or ramp deployment shall comply with 810.2. Advisory F209.2.2 Bus Loading Zones. The terms "designated public transportation" and "specified public transportation" and "specified public transportation" are defined by the Department of Transportation at 49 CFR 37.3 in regulations implementing the
Americans with Disabilities Act. These terms refer to public transportation vehicles include buses and vans operated by public transportation vehicles include tour and charter buses, taxis and limousines
be provided at entries to queues and waiting lines. F206.4 Entrances shall be provided in accordance with F206.4. Entrances shall be provided in accordance with F245.4.2 and F245.4.3 shall coincide with on an accessible route complying with 402. F245.4.4 Location Outdoor recreation access routes required by F245.4.3 shall coincide with one and shall be provided in accordance with F206.4. Entrances Entrances Shall be provided in accordance with F206.4. Entrances Shall be provided in accordance with F20
be located in the same area as general circulation paths. F217.2 Wheelchair accessible telephones with Table F217.2. EXCEPTION: Drive-up only public telephones shall not be required to comply with F217.2. Table F217.2.
Wheelchair accessible Telephones Number of Telephones Number of Required Wheelchair Accessible Telephones 1 or more single units 1 per floor, level, and exterior site 2 or more banks 1 per floor, level, and exterior site 1 bank 1 per floor, level, and exterior site 2 or more banks 1 per floor, level, and exterior site 1 bank 1 per floor, level, and exterior site 2 or more banks 1 per floor, level, and exterior site 2 or more banks 1 per floor, level, and exterior site 1 bank 1 per floor, level, and exterior site 2 or more banks 1 per floor, level, and exterior site 2 or more banks 1 per floor, level, and exterior site 3 or more banks 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per floor, level, and exterior site 4 bank 1 per flo
volume controls complying with 704.3. F217.4 TTYs TTYs complying with 704.4 shall be provided in accordance with F217.4. Advisory F217.4 TTYs. Separate requirements are provided based on the number of public pay telephones provided at a bank of telephones, within a floor, a building, or on a site. In some instances one TTY can be used to
satisfy more than one of these requirements. For example, a TTY on an exterior site cannot be met by installing a TTY in a bank inside a building. However, the requirements for a bank can accommodate both digital and
analog transmissions for compatibility with digital and analog TTYs. F217.4.1 Bank Requirement Where four or more public TTY complying with 704.4 shall be provided at a bank of telephones, at least one public TTY complying with 704.4 shall be provided at that bank. Only trails that directly connect to a trailhead or another trail that substantially meets the
requirements in 1017 are required to comply with 1017. Inaccessible joint use areas may prevent access to and from leased space. F203.6 Machinery Spaces frequented only by service personnel for maintenance, repair, or occasional monitoring of equipment shall not be required to comply with these requirements or to be on an accessible
                                                                                                                                                                                                                                                                        oment catwalks; water or sewage treatment pump rooms and stations; electric substations and transformer vaults: and highway and tunnel utility facilities. 2. In row seating, two
                               spaces include, but are not limited to, elevator pits or elevator penthouses; mechanical, electrical or communications equipment rooms; piping or equip
wheelchair spaces shall be permitted to be located side-by-side. Advisory F206.2.4 Spaces and Elements Exception 1. The exception does not apply to areas, attorney areas, or witness stands. 2. In assembly areas with fixed seating required to
comply with F221, an accessible route shall not be required to serve fixed seating where wheelchair spaces required to be on an accessible route and shall comply with 1008.4. Advisory F240.2.2
Elevated Play Components. A double or triple slide that is part of a composite play structure is one elevated play component. F244.2 shall apply only to the camping units that are altered or added until the number of camping units with mobility
features complies with the minimum number required in Table 244.2. EXCEPTION: Where an entity is implementing a transition plan for program accessibility developed pursuant to regulations issued under Section 504 of the Rehabilitation Act that designates specific camping units to provide mobility features complying with F244.2, the entity shall
not be required to comply with F244.2 when altering individual elements within a camping unit are altered, the altered camping unit is required to comply with F244.2. Advisory F244.2.1 Alterations and Additions Exception. When all the elements within a camping unit are altered, the altered camping unit is required to comply with F244.2 unless that are not designated to provide mobility features complying unit are altered.
the minimum number of camping units with mobility features required in Table 244.2 is provided. F201.2 Application Based on Building, facility, room, or space contains more than one use, each portion shall comply with the applicable requirements for that use. F233.3.4 Alterations Alterations shall comply with
F233.3.4. EXCEPTION: Where compliance with 809.2.1, 809.2.3, or 809.2.4 is technically infeasible to provide an accessible route to a residential dwelling unit, the entity shall be permitted to alter or construct a comparable residential dwelling unit to comply with 809.2 provided that the minimum number of
residential dwelling units required by F233.3.1.1 and F233.3.2.1, as applicable, is satisfied. F202.6.2 Accessible Route Primary function areas, as defined by Administrator of the General Services Administrator, the Secretary of Defense, the Secretary of Defense and Defense are the Secretary of Defense are the Secretary
least one accessible route complying with F206. Elements and spaces required to be accessible by F202.6 shall be on an accessible route complying with F206. Advisory F208.3.1 General Exception 2. Factors that could affect "user convenience" include, but are not limited to, protection from the weather, security, lighting, and comparative
maintenance of the alternative parking site. 10. Advisory F206.2.2 Within a Site. An accessible route is required to connect to the boundary of each area of sport activity. Advisory F214.1 General Exception. Washers and dryers provided in employee work areas. For
example, if trainees are housed in a dormitory and provided access to washers and dryers, those facilities are not considered part of the employee work area. Examples of washing machines and clothes dryers provided in employee work area.
Story Buildings and Facilities At least one accessible route shall connect each story and mezzanine in multi-story buildings, and generating more of our energy locally. F208.2.3 Residential facilities Parking spaces provided to serve facilities with residential dwelling units shall comply without facilities.
F208.2.3. F208.2.3.1 Parking for Residents Where at least one parking space is provided for each residential dwelling unit, at least one parking space complying with 809.2. F208.2.3.2 Additional Parking space somplying with 502 shall be provided for each residential dwelling unit required to provide mobility features complying with 502 shall be provided for each residential dwelling unit required to provide mobility features complying with 502 shall be provided for each residential dwelling unit.
number of parking spaces provided for each residential dwelling unit, 2 percent, but no fewer than one space, of all the parking spaces not covered by F208.2.3.1 shall comply with 502. 6. Where exceptions for alterations to gualified historic buildings or facilities are permitted by F208.5, an
accessible route shall not be required to stories located above or below the accessible story. F224 Transient Lodging Guest Rooms F224.1 General Transient lodging facilities used for transient lodging including time shares, dormitories, and town homes
may be covered by both these requirements and the Fair Housing Amendments Act. The Fair Housing Amendments Act requires that certain residential structures having four or more multi-family dwelling units, regardless of whether they are privately owned or federally assisted, include certain features of accessible and adaptable design according
to quidelines established by the U.S. Department of Housing and Urban Development (HUD). This law and the appropriate regulations should be consulted before proceeding with F215. Where ramps connect elevated play components, the
maximum rise of any ramp run is limited to 12 inches (305 mm). 2. Where exceptions for alterations to qualified historic buildings or facilities are permitted by F202.5 and toilet room complying with F213.2.1 shall be provided. F242.3 Wading Pools or facilities are permitted by F202.5 and toilet room complying with F213.2.1 shall be provided.
At least one accessible means of entry shall be provided for wading pools. Accessible means of entry shall be provided for spas. Accessible means of entry shall be provided for spas. Accessible means of entry shall be provided for spas. Accessible means of entry shall be provided for spas. Accessible means of entry shall be provided for spas. Accessible means of entry shall be provided for spas.
with 1009.4; or transfer systems complying with 1009.5. EXCEPTION: Where spas are provided in a cluster, no more than 5 percent, but no fewer than one, spa in each cluster shall be required to comply with F242.4. F243 Shooting Facilities with Firing Positions F243.1 General Where shooting facilities with firing positions are designed and
constructed at a site, at least 5 percent, but no fewer than one, of each type of firing position shall comply with 1010. F221.2.2 Integration. The requirement that wheelchair spaces shall be dispersed horizontally. Advisory F221.2.2 Integration with 1010 in the requirement that wheelchair spaces shall be dispersed horizontally.
be placed within the footprint of the seating area. Wheelchair spaces cannot be segregated from seating areas. For example, it would be unacceptable to place only the wheelchair spaces and their associated companion seats, outside the seating areas defined by risers in an assembly area. It will also help us if you tell
us which assistive technology you use. F239 Miniature Golf Facilities F239.1 General Miniature Golf Facilities F238.1 General Golf Facilities F238.1 General Golf Facilities F238.1 General Golf Facilities F239.1 General Golf Facilities F238.1 General Golf Facilities F239.1 Genera
writing surfaces provided at check-out aisles not required to comply with 904.3 shall not be required to comply with 902. F239.3 Miniature golf courses shall be configured so that the holes complying with 1007.3 are consecutive. Miniature golf courses shall provide an accessible route from the last hole
complying with 1007.3 to the course entrance or exit without requiring travel through any other holes on the course, F225.3 Self-Service Storage Facilities shall provide individual self-service storage facilities shall pro
Total Spaces in FacilityMinimum Number of Spaces Required to be Accessible 1 to 200 5 percent, but no fewer than 1 201 and over 10, plus 2 percent of total number of units over 200 Advisory F225.3 Self-Service Storage Facilities. Although there are no technical requirements that are unique to self-service storage facilities, elements and spaces
provided in facilities containing self-service storage spaces required to comply with these requirements must provide accessible Routes complying with Section F206; Accessible Means of Egress complying with these requirements must provide accessible Routes acce
Section F207; Parking Spaces complying with Section F208; and, where provided, other public use or common use elements and facilities such as toilet rooms, drinking fountains, and telephones must comply with the applicable requirements of this document. F219.2 Required Systems In each assembly area where audible communication is integral
to the use of the space, an assistive listening system shall be provided. F216.6 Entrances complying with 404, entrances complying with 703.7.2.1. Directional signs complying with 703.5 that indicate the location of the nearest entrance complying
with 404 shall be provided at entrances that do not comply with 404. F213 Toilet Facilities and bathing facilities are provided in facilities and bathing facilities are provided in fa
by an accessible route, toilet facilities and bathing facilities; 3. F240.2.1.1 Minimum Number and Types Where ground level play components are provided, at least one of each type shall be on an accessible route and shall comply with 1008.4.
F240.2.1.2 Additional Number and Types Where elevated play components are provided, ground level play components are provided in accordance with Table F240.2.1.2 and shall comply with 1008.4. EXCEPTION: If at least 50 percent of the elevated play components are connected by a ramp and at least 3 of the elevated play components
connected by the ramp are different types of Play Components, the play area shall not be required to comply with F240.2.1.2. Table F240.2.1.2. Number and Types of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground Level Play Components Required to be on accessible Routes Number of Ground L

Additional Number and Types. Where a large play area includes two or more composite play structures must be added to determine the additional number and types of ground level play components that must be provided on an
accessible route. F216 Signs F216.1 General Signs shall be provided in accordance with F216 and shall complying with F221.2.1. F221.2.1. Wumber and Location Wheelchair spaces complying with 802.1 shall be provided in accordance with Table F221.2.1.1. Table
F221.2.1.1 Number of Wheelchair Spaces in Assembly Areas Number of SeatsMinimum Number of Required Wheelchair Spaces 4 to 25 1 26 to 50 2 51 to 150 4 151 to 300 5 301 to 500 6 501 to 500 6 501 to 5000 6, plus 1 for each 150, or fraction thereof, between 501 through 5000 5001 and over 36, plus 1 for each 200, or fraction thereof, over 5000 F221.2.1.2
Luxury Boxes, Club Boxes, and Suites in Arenas, Stadiums, and Grandstands In each luxury box, club box, and suite within arenas, stadiums, and grandstands, wheelchair spaces complying with 802.1 shall be provided in accordance with Table F221.2.1.1. Advisory F221.2.1.2 Luxury Boxes, Club Boxes, and Suites in Arenas, Stadiums, and
Grandstands. The number of wheelchair spaces for Recreational Vehicles at Dump Stations Where provided, pull-up spaces for recreational vehicles at dump stations shall comply with
1012.2, 1012.4, and 1012.5. F244.5 Outdoor Recreation Access Routes Camping facilities shall provide outdoor recreation Access Routes complying with 1016 in accordance with F244.5. Advisory F244.5 Outdoor Recreation Access Routes complying with 1016 in accordance with F244.5.
specified in 1019 apply. 4. Within multi-story transient lodging guest rooms with mobility features required to comply with 806.2, an accessible route shall not be required to connect stories provided on a story served by
an accessible route. EXCEPTIONS: 1. An accessible route shall not be required to press boxes in bleachers that have points of entry at only one level provided that the aggregate area of all press boxes is 500 square feet (46 m2) maximum. F231.2 Courtrooms Each courtroom shall comply with 808. The number of wheelchair spaces required in boxes
covered by 221.2.1.3 is calculated based on the total number of seats provided in these other boxes. The resulting number of wheelchair spaces must be located in no fewer than 20% of the boxes covered by this section. For example, a concert hall has 20 boxes, each of which contains 10 seats, totaling 200 seats. In this example, 5 wheelchair
spaces would be required, and they must be placed in at least 4 of the boxes. Advisory F245.4.3 does not modify the accessible route requirements in F206 that apply to adjacent recreation facilities. F228 Depositories, Vending Machines, Change Machines, Mail Boxes, and Fuel Dispensers F228.1 General
Where provided, at least one of each type of depository, vending machine, change machine, and fuel dispenser shall comply with 1002.3. F234.2 Load and Unload Areas Load and unload areas serving amusement rides shall comply with 1002.3. F234.2 Load and Unload Areas Load and Unload areas serving amusement rides shall comply with 1002.3. F234.2 Load and Unload Areas Load and Unload areas serving amusement rides shall comply with 1002.3. F234.2 Load and Unload Areas Load A
1002.4, or at least one amusement ride seat designed for transfer complying with 1002.5, or at least one transfer device complying with 1002.6. EXCEPTIONS: 1. Amusement rides designed primarily for children, where children are assisted
on and off the ride by an adult, shall not be required to comply with F234.3. Amusement rides controlled or operated by the rider, designed for children, or rides without ride seats
are not required to comply with F234.3. These rides are not exempt from the other provisions in F234 requiring an accessible route to the load and unload areas and to the ride to make incidental movements, but where the patron otherwise has no control over the ride
Advisory F205.1 General. Controls covered by F205.1 include, but are not limited to, light switches, circuit breakers, duplexes and other convenience receptacles, environmental and appliance controls, plumbing fixture controls, and security and intercom systems. F217.5 Shelves for Portable TTYs Where a bank of telephones in the interior of a
building consists of three or more public pay telephone at the bank shall be provided with a shelf and an electrical outlet in accordance with 704.5. EXCEPTIONS: 1. Secured areas of detention and correctional facilities where shelves and outlets are prohibited for purposes of security or safety shall not be required
to comply with F217.5. 2. The shelf and electrical outlet shall not be required at a bank of telephones with a TTY. F247.4 Trail Facilities where provided on trails, facilities are required at a bank of telephones with 1017. Toilet facilities; or 4.

F209.4 Valet Parking Parking Parking facilities that provide at least one passenger loading zone complying with 503. F211.3 More Than Minimum Number of drinking fountains provided shall
comply with 602.1 through 602.6, and 50 percent of the total number of drinking fountains provided shall comply with 602.7. EXCEPTION: Where 50 percent of the drinking fountains yields a fraction, 50 percent shall be permitted to be rounded up or down provided that the total number of drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction, 50 percent of the drinking fountains yields a fraction of the drinking fountains yield
of drinking fountains. F202.6.5.7 Depositories, Vending Machines, and Mail Boxes Depositories, vending machines, and mail boxes shall comply with F228. Advisory F242.2 Swimming Pools Exception 1. Pool walls at diving areas and areas along pool walls where there is no pool entry because of landscaping or
 adjacent structures are to be counted when determining the number of accessible means of entry required. In addition, at least 2 percent of the residential dwelling units shall comply where a building is vacated with the intent to alter the building.
Buildings that are vacated solely for pest control or asbestos removal are not subject to the requirements to provide residential dwelling units with mobility features or communication features. EXCEPTIONS: 1. Where means of egress are permitted by local building or life safety codes to share a common path of egress travel, accessible means of
egress shall be permitted to share a common path of egress travel. F206.7.5 Existing Site Constraints Platform lifts shall be permitted where existing exterior site constraints make use of a ramp or elevator infeasible. F227.5 Queues and Waiting Lines Queues and waiting lines servicing counters or check-out aisles required to comply with 904.3 or
904.4 shall comply with 403. F248.1.2 Beach Nourishment Beach access routes shall be provided in a number complying with F248.2 where the entity that administers or manages a beach nourishment project. F245.2.5 Elements Within Picnic Units with Mobility Features Elements within picnic units required to provide mobility
features shall comply with F245.2.5. F245.2.5.1 Outdoor Constructed Feature shall comply with 1011. Advisory F247.2 Existing Trails. Routine or periodic maintenance activities that are performed to return an existing trail to the condition to which the trail was originally
designed are not required to comply with 1017. EXCEPTION: Beach access routes shall not be required where pedestrian access to the beach is not permitted. Where a stand-alone slide is provided, an accessible route must connect the base of the slide is provided, an accessible route must connect the base of the slide is provided.
not required. Where a sand box is provided, an accessible route must connect to the border of the sand box. Accessibility to the sand box would be enhanced by providing a transfer system into the sand box would be enhanced by providing a transfer system into the sand box.
who use wheelchairs or other mobility devices may be able to use, or may choose not to use, transfer systems. F214.2 Washing machines are provided, at least one shall comply with 611. In facilities with residential
dwelling units, an accessible route shall not be required to comply with 809.2, all common use areas serving residential dwelling units are on an
accessible route. F233.3.4.1 Alterations to Vacated Buildings Where a building with 809.2 and shall be on an accessible route as required by F206. Water shut-off valves shall not be required to comply with 309. Some play components that are
attached to a composite play structure can be approached or exited at the ground level or above grade from a platform or deck. For example, a climber attached to a composite play structure. Play components that are attached to a
composite play structure and can be approached from a platform or deck (e.g., climbers and overhead play components) are considered ground level play components and do not count toward the requirements in F240.2.1.2 regarding the number of ground level play components
that must be located on an accessible route. 4. Where play components are altered and the ground surface is not altered, the ground surface shall not be required to comply with 1008.2.6 unless required by F202.4. Advisory F240.1 General. Play areas may be located on exterior sites or within a building. Where separate play areas are provided
within a site for children in specified age groups (e.g., preschool (ages 2 to 5) and school age (ages 5 to 12)), each play area must comply with this section. Where play area and another is located next to a softball field), they are
considered separate play areas and each play area must comply with this section. F234.4.1 Load and Unload Areas Where load and unload areas shall comply with 1002.3. F234.4.2 Minimum Number Where the structural or operational characteristics of
an amusement ride are altered to the extent that the amusement ride's performance differs from that specified by the manufacturer or the original design, the amusement ride shall comply with F235. Advisory F206.2.7 Press Boxes Exception
2. Where a facility contains multiple assembly areas, the aggregate area of the press boxes in each assembly area is to be calculated separately. For example, if a university has a soccer stadium with three press boxes elevated 12 feet (3660 mm) or more above grade and each press box is 150 square feet (14 m2), then the aggregate area of the
soccer stadium press boxes is less than 500 square feet (465 m2) and Exception 2 applies to the soccer stadium. If that same university also has a football stadium with two press boxes elevated 12 feet (3660 mm) or more above grade and one press box is 250 square feet (23 m2), and the second is 275 square feet (26 m2), then the aggregate area of
the football stadium press boxes is more than 500 square feet (465 m2) and Exception 2 does not apply to the football stadium. EXCEPTION: Other than in courtrooms, assistive listening systems shall not be required where audio amplification is not provided. Circulation paths; 2. F233.4.1.2 Facilities Containing Emergency Transportable Housing
Units Emergency transportable housing units with mobility features shall be provided by Occupant of Unit Where emergency transportable housing units are installed on private sites provided by the occupant of the unit, entities shall provide emergency transportable housing units
with mobility features complying with 809.2 as determined by a needs assessment conducted by the entity providing the emergency transportable housing units. 2. In existing play areas, where play components are relocated for the purposes of creating safe use zones and the ground surface is not altered or extended for more than one use zone, the
play area shall not be required to comply with F240. EXCEPTION: The number of beach access points provided by the entity to a beach. In emergency transportable housing units, platform lifts shall not be used at the primary entrance to a unit required to provide mobility
 features complying with 809.2. F206.7.1 Performance Areas and Speakers' Platforms Platform lifts shall be permitted to provide accessible routes to performance areas and speakers' platforms. Table F244.2 Camping Units with Mobility Features Total Number of Camping Units with Mobility Features Total Number of Camping Units with Mobility Features.
Mobility Features Required 1 1 2 to 25 2 26 to 50 3 51 to 75 4 76 to 100 5 101 to 150 7 151 to 200 8 201 and over 8, plus 2 percent of the number over 200 Advisory F244.2 Camping units with camp shelters are different
types of camping units. F233.4.5.2 Alterations to Individual Residential Dwelling Units In individual residential dwelling units, where a bathroom or a kitchen is substantially altered, and at least one other room is altered, the requirements of F233.4.1 shall apply to the altered residential dwelling units until the total number of residential dwelling
units complies with the minimum number required by F233.4.1.1 and F233.4.2.1. Residential dwelling units required by F206. F206.7.2 Wheelchair Spaces Platform lifts shall be on an accessible route as required by F206. F206.7.2 Wheelchair Spaces Platform lifts shall be on an accessible route as required by F207. The same of the comply with the wheelchair Spaces Platform lifts shall be on an accessible route as required by F208. F
sight requirements of F221 and 802. Berms or sculpted dirt may be used to provide elevation and may be part of an accessible route to composite play structures. Advisory F206.2.3 Multi-Story Buildings and Facilities. Spaces and elements located on a level not required to be served by an accessible route must fully comply with this document. While
a mezzanine may be a change in level, it is not a story. If an accessible route is required to connect stories within a building or facility, the accessible route must serve all mezzanines. Advisory F248.1 General. There are exceptions in 1018.1 that can be used where conditions specified in 1019 apply. Removable beach access routes can be moved to a
protected storage area during storms and other periods when the routes are subject to damage or loss. Camping units with mobility features on websites, in brochures, and at bulletin boards or information kiosks at the
 camping facility. Where entities operate reservation systems for camping units or assign camping units upon arrival, entities should establish policies to ensure that camping units are occupied. Additionally, because the wheelchair spaces must also meet the
dispersion requirements of 221.2.3, the boxes containing these wheelchair spaces cannot all be located in one area unless an exception to the dispersion requirements applies. Table F219.3 Receivers for Assistive Listening Systems Capacity of Seating in Assembly AreaMinimum Number of Required
per 100 seats over 2000 seats 1 per 4 receivers 1 Table Legend: 1. F240 Play Areas F240.1 General Play areas for children ages 2 and over shall comply with F240. Where separate play areas are provided within a site for specific age groups, each play areas are provided within a site for specific age groups, each play areas are provided within a site for specific age groups, each play areas are provided within a site for specific age groups, each play areas are provided within a site for specific age groups, each play areas are provided within a site for specific age groups.
as office buildings, courthouses, and other facilities where admittance to the building or restricted spaces is dependent on two-way communication systems. EXCEPTION: Where facilities contain 15 or fewer residential
dwelling units, the requirements of F233.4.1.1 and F233.4.2.1 shall apply to the total number of residential dwelling units that are altered under a single contract, or are developed as a whole, whether or not located on a common site. Advisory F233.1 General. Section F233 outlines the requirements for residential facilities subject to the
Architectural Barriers Act. The facilities covered by Section F233, as well as other facilities not covered by this section, may still be subject to other Federal laws such as the Fair Housing Act requires that certain residential structures having four or
more multi-family dwelling units, regardless of whether they are privately owned or federally assisted, include certain features of accessible and adaptable design according to guidelines established by the U.S. Department of Housing and Urban Development (HUD).
with the design and construction of residential facilities in accordance with F245.4, viewing areas in accordance with F246.3, or trailheads in accordance with F247.3.2.2.
Accessible routes shall not be required where camping facilities, picnic facilities, viewing areas, or outdoor constructed features are provided on trails. F217.4.5 Rest Stops, Emergency Roadside stop, or service plaza, at least one
public TTY shall be provided. Advisory F233.4.5.2 Alterations to Individual Residential Dwelling Units. Section F233.4.4.2 uses the terms "substantially altered" and "altered" and "altered" and the plan configuration, or replacement of
cabinetry. Substantial alterations do not include normal maintenance or appliance and fixture replacement, unless such maintenance or replacement of cabinetry. The term "alteration" is defined in Section F106 of these requirements. EXCEPTION: The inmate or
detainee side of cubicles or counters at non-contact visiting areas not serving holding cells or housing cells required to comply with F232 shall not be required to comply with 902 or 904.4.2. F232.5.2 Partitions Where solid partitions or security glazing separate visitors from detainees or inmates at least one of each type of cubicle or counter partitions.
shall comply with 904.6. F233 Residential Facilities F233.1 General Facilities with residential dwelling units shall comply with F233. 2. F206.2.11 Court Sports In court sports, at least one accessible route shall directly connect both sides of the court. Advisory F242.2 Swimming Pools. Where more than one means of access is provided into the water,
it is recommended that the means be different. Providing different means of access will better serve the varying needs of people with disabilities in getting into and out of a swimming pool. It is also recommended that where two or more means of access are provided, they not be provided in the same location in the pool. Different locations will
provide increased options for entry and exit, especially in larger pools. F221.2.1.4 Team or Player Seating areas of sport activity. EXCEPTIONS: 1. In alterations where it is technically infeasible to comply with 603, altering existing toilet or
 bathing rooms shall not be required where a single unisex toilet room or bathing room complying with F213.2.1 is provided and located in the same area and on the same floor as existing inaccessible toilet or bathing rooms. We also use cookies set by other sites to help us deliver content from their services. F202.4 Alterations Affecting Primary
Function Areas In addition to the requirements of F202.3, an alteration that affects or could affect the usability of or access to an area containing a primary function shall be made so as to ensure that, to the maximum extent feasible, the path of travel to the altered area, including the rest rooms, telephones, and drinking fountains serving the altered
area, are readily accessible to and usable by individuals with disabilities, unless such alterations are disproportionate to the Oeneral Services Administration, the Secretary of Defense, the Secretary of Housing and Urban Development, or
the United States Postal Service. EXCEPTION: Wheelchair spaces in team or player seating areas of sport activity shall not be required to comply with F221.2.3. Advisory F221.2.3. Lines of Sight and Dispersion. Consistent with the overall intent of the ADA, individuals who use wheelchairs must be provided equal access so that their
experience is substantially equivalent to that of other members of the audience. Thus, while individuals who use wheelchairs need not be provided with the best seats in the house, neither may they be relegated to the worst. 2. In alterations, stairs between levels that are connected by an accessible route shall not be required to comply with 504,
except that handrails complying with 505 shall be provided when the stairs are altered. F212.2 Kitchens and Kitchenettes Shall comply with 811. F213.3 Plumbing Fixtures and Accessories Plumbing fixtures and Kitchenettes Shall comply with 811. F213.3 Plumbing Fixtures and Accessories Plumbing Fixtures and Kitchenettes Shall comply with 804. F225.2 Storage Where storage is provided in accessible spaces, at least one of each type shall comply with 811. F213.3 Plumbing Fixtures and Accessories Plumbing Fixtures and Accessories Plumbing Fixtures and English Fixtures and Engl
accessories provided in a toilet room or bathing room required to comply with F213.2 shall comply with 604.8.1. In addition to the compartment required to comply with 604.8.1, at least one compartment shall comply with F213.3. F213.3.1 Toilet Compartment shall comply with F213.2 shall comply with F213.3. F213.3.1 Toilet Compartment shall comply with F213.3.1 Toilet Compartment shall compartm
with 604.8.2 where six or more toilet compartments are provided, or where the combination of urinals and water closets totals six or more fixtures. F208.2.2 Rehabilitation Facilities and Outpatient Physical Therapy Facilities Physical Therapy Physical Therapy Physical Therapy Physical Therapy Physical T
conditions that affect mobility and outpatient physical therapy facilities shall comply with 502. Advisory F221.2.3.1 Horizontal Dispersion. Horizontal Dispersion of wheelchair spaces in an assembly facility seating area from side-to-side or, in the case of an arena or stadium, around the field of play or performance area
F216.9 TTYs Identification and directional signs for public TTYs shall be provided in accordance with F216.9. Testional Symbol of TTY complying with 703.7.2.2. F216.9.2 Directional signs Directional signs indicating the location of the nearest public TTY shall be provided at all
banks of public pay telephones not containing a public TTY. In addition, where signs provide direction to public pay telephones, they shall also provide direction to public TTYs. Directional signs shall comply with 703.7.2.2. F216.10 Assistive Listening Systems Each assembly
area required by F219 to provide assistive listening systems shall provide signs informing patrons of the availability of the assistive listening system. Assistive listening systems shall comply with 703.7.2.4. EXCEPTION: Where ticket offices or windows are
provided, signs shall not be required at each assembly area provided that signs are displayed at each ticket office or window informing patrons of the availability of assistive listening systems. F206.2.5 Restaurants and Cafeterias In restaurants and cafeterias, an accessible route shall be provided to all dining areas, including raised or sunken dining
areas, and outdoor dining areas. F206.7.3 Incidental Spaces Platform lifts shall be permitted by section 1003.2.13.4 of the
International Building Code (2000 edition and 2001 Supplement) or section 1007.5 of the International Building Code (2003 edition) (incorporated by reference, see "Referenced Standards" in Chapter 1) to serve as a part of an accessible means of egress. F232.2.1 Cells with Mobility Features At least 2 percent, but no fewer than one, of the total
number of cells in a facility shall provide mobility features complying with 807.2. F232.2.1.1 Beds In cells having more than 25 beds, at least 5 percent, but no fewer than one, of the total number of general holding cells and
general housing cells equipped with audible emergency alarm systems and permanently installed telephones within the cell shall provide communication features complying with 807.3. F232.3 Special Housing Cells and Special Housing Cells or special housing cells or special housing cells are provided, at least one cell serving each purpose shall
provide mobility features complying with 807.2. Cells subject to this requirement include, but are not limited to, those used for purposes of orientation, protective custody, administrative or disciplinary detention or segregation, detoxification, and medical isolation. F234.4 Existing Amusement Rides Where existing amusement rides are altered, the
 alteration shall comply with F234.4. Advisory F234.4 Existing Amusement Rides. Routine maintenance, painting, and changing of theme boards are examples of activities that do not constitute an alteration subject to this section. Trails that have a designed
use for other than hikers or pedestrians are not required to comply with 1017. 5. In air traffic control towers, an accessible route shall not be required to comply except to the extent determined by regulations issued by the appropriate
Federal agency having authority under Section 504 of the Rehabilitation Act of 1973. F209.2.3 On-Street Bus Stops On-street bus stops shall comply with 810.2 to the maximum extent practicable. 2. In alterations, where compliance with applicable requirements is technically infeasible, the alteration shall comply with the requirements to the
maximum extent feasible. F221.2.1.3 Other Boxes In boxes other than those required to comply with F221.2.1.1. Wheelchair spaces shall be located in not less than 20 percent of all boxes provided. Wheelchair spaces shall comply with 802.1
Advisory F221.2.1.3 Other Boxes. The provision for seating provided in facilities such as performing arts auditoria where tiered boxes are designed for spatial and acoustical purposes. 5. HVAC diffusers shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible means of entry shall not be required to comply with 309. F242.2 Swimming Pools At least two accessible mean
be provided for swimming pools. Accessible means of entry shall be swimming pool lifts complying with 1009.2; sloped entries complying with 1009.3; transfer walls complying with 1009.4; transfer systems complying with 1009.5 and pool stairs complying with 1009.6. At least one accessible means of entry provided shall comply with 1009.2 or
1009.3. EXCEPTIONS: 1. Where a swimming pool has less than 300 linear feet (91 m) of swimming pool wall, no more than one accessible means of entry is a swimming pool lift complying with 1009.2 or sloped entry complying with 1009.3. 2. Wave action pools, leisure rivers, sand
bottom pools, and other pools where user access is limited to one area shall not be required to provide more than one accessible means of entry provided that the accessible means of entry provided that the accessible means of entry provided that the accessible means of entry is a swimming pool lift complying with 1009.2, a sloped entry complying with 1009.3, or a transfer system complying with 1009.5. 3. Catch pools shall not be
required to provide an accessible means of entry provided that the catch pool edge is on an accessible route. F215.3 Employee Work Areas Where employee work areas have audible alarm system. F206.7.10 Recreational Boating
Facilities and Fishing Piers and Platforms Pla
pictograms are provided as designations of permanent interior rooms and spaces, the pictograms shall comply with 703.2 and 703.5. EXCEPTION: Exterior signs that are not located at the door to the space they serve shall not be required to comply with 703.2. Advisory F216.2 Designations.
 Section F216.2 applies to signs that provide designations, labels, or names for interior rooms or spaces where the sign is not likely to change over time. Examples include interior signs labeling restrooms, room and floor numbers or letters, and room names. Tactile text descriptors are required for pictograms that are provided to label or identify a
permanent room or space. F206.5.2 Rooms and Spaces Within a building or facility, at least one door, doorway, or gate serving each room or space complying with these requirements shall comply with 404. EXCEPTION: The detainee side of cubicles or counters at non-contact visiting areas not serving holding cells required to comply with F231 shall
not be required to comply with 902 or 904.4.2. F231.4.2 Partitions Where solid partitions or security glazing separate visitors from detainees at least one of each type of cubicle or counter partition shall comply with 904.6. F232 Detention Facilities and Correctional Facilities F232.1 General Buildings, facilities, or portions thereof, in which people are
detained for penal or correction purposes, or in which the liberty of the inmates is restricted for security reasons shall comply with F232. Pictograms that provide information about a room or space, such as "no smoking," occupant logos, and the International Symbol of Accessibility, are not required to have text descriptors. F206.6.1 Existing
309.3. 8. Exercise machines and exercise equipment shall not be required to comply with 309. EXCEPTION: Toilet rooms that are part of critical or intensive care patient sleeping rooms shall not be required to comply with 309. EXCEPTION: Toilet rooms that are part of critical or intensive care patient sleeping rooms shall not be required to comply with 603. F216.13 Trailhead Signs Where new trail information signs are provided at trailheads on newly constructed or altered
trails designed for use by hikers or pedestrians, the signs shall comply with 1017.10. F216.4.2 Areas of Refuge Signs required by section 1003.2.13.5.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of the International Building Code (2000 edition) or section 1007.6.4 of t
instructions in areas of refuge shall comply with 703.5. F216.4.3 Directional Signs Signs required by section 1003.2.13.6 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International Building Code (2000 edition) or section 1007.7 of the International
of egress shall comply with 703.5. F216.5 Parking Parking spaces, including accessible parking spaces, and ac
provided, at least 5 percent shall comply with 902. F241 Saunas and Steam Rooms F241.1 General Where a building contains more than one assembly area and the assembly area and the assembly area and the assembly area and steam rooms shall comply with 612. Where a building contains more than one assembly area and the assembly area.
receivers shall be permitted to be calculated according to the total number of seats in the building provided that all receivers are usable with all systems. F225.2.2 Self-service shelving shall not be required to comply with 308.
to Adjacent Recreation Facilities Where a circulation path connects camping facilities and adjacent recreation facilities on trails are addressed in each adjacent recreation facilities. Advisory F244.1 General. Camping facilities on trails are addressed in each adjacent recreation facilities.
F247.4.1. F244.2 Camping Units with Mobility Features Camping units with Mobility Features complying with F244.2 in accordance with Table F244.2. Where a camping units provided and Service F227.1
Informational Signs. Information about interior spaces and facilities includes rules of conduct, occupant load, and similar signs. Signs providing direction to rooms or spaces include those that identify egress routes. F206.4.8 Service Entrances If a service entrance is the only entrance to a building or to a tenancy in a facility, that entrance shall
comply with 404. F247.2 Existing Trails Where the original design, function, or purpose of an existing trail is changed and the altered portion of the trail directly connects to a trailhead or another trail that substantially meets the requirements in 1017, the altered portion of the trail shall comply with 1017. F206.2.4 Spaces and Elements At least one
accessible route shall connect accessible building or facility entrances with all accessible spaces and elements within the building or facility which are otherwise connected by a circulation path unless exempted by F206.2.3 Exceptions 1 through 6. F244.3 Outdoor Constructed Features in Common Use and Public Use Areas Where provided in
common use and public use areas that serve camping units with mobility features, at least 20 percent, but not less than one, of each type of outdoor constructed feature provided at each location shall comply with 1011. F206.5 Doors, Doorways, and Gates Doors, doorways, and gates providing user passage shall be provided in accordance with
F206.5. F206.5.1 Entrances Each entrance to a building or facility required to comply with F208.2.3.3 Parking for Guests, Employees, and Other Non-Residents Where parking spaces are provided for persons other than residents, parking shall be provided in accordance with
Table F208.2. F208.2.4 Van Parking Spaces For every six or fraction of six parking spaces required by F208.2 to complying with 502. An exception to F213.1 exempts pit toilets from the requirements for accessible toilet facilities. EXCEPTION: In detention or correctional facilities, drinking
fountains only serving holding or housing cells not required to comply with F231. EXCEPTIONS: 1. In alterations, an accessible route shall not be required to existing raised or sunken dining areas, or to all parts of existing
outdoor dining areas where the same services and decor are provided in an accessible space usable by the public and not restricted to use by people with disabilities. F210 Stairways F210.1 General Interior and exterior stairs that are part of a means of egress shall comply with 504. F202.3.2 Extent of Application An alteration of an existing element
space, or area of a building or facility shall not impose a requirement for accessibility greater than required for new constructed so that a golf car can enter and exit the teeing ground where
compliance is not feasible due to terrain. F206.7.6 Guest Rooms and Residential Dwelling Units Platform lifts shall be permitted to connect levels within transient lodging guest rooms required to provide mobility features complying with 809.2. F206.7.7
Amusement Rides Platform lifts shall be permitted to provide accessible routes to load and unload areas serving amusement rides. F248 Beach Access routes shall be permitted to provide in accordance with F248.1. Beach access routes shall be permitted to provide accessible routes to load and unload areas serving amusement rides. F248 Beach Access Routes F248.1. Beach access routes shall be permitted to provide accessible routes to load and unload areas serving amusement rides.
Dispersion Exception 2. Points of entry to bleacher seating may include, but are not limited to, cross aisles, concourses, vomitories, and entrance ramps and stairs. Vertical, center, or side aisles adjoining bleacher seating areas serving areas of sport
activity shall not be required to comply with F221.4. Advisory F221.4 Designated Aisle Seats. When selecting which aisle seats will meet the requirements of 802.4, those aisle seats which are closest to, not necessarily on, accessible routes must be selected first. For example, an assembly area has two aisles (A and B) serving seating areas with an
accessible route connecting to the top and bottom of Aisle A only. The aisle seats on Aisle A would not meet the five percent minimum would seats on Aisle B be designated. Advisory F227.3 Counters. Types of counters that provide
different services in the same facility include, but are not limited to, order, pick-up, express, and returns. One continuous counter can be used to provide access only to the part of the counter where orders are taken when orders are
picked-up at a different location on the same counter. Both the order and pick-up section of the counter must be accessible. 3. In assembly areas, aisle stairs shall not be required to comply with 504. F228.2 Mail Boxes Where mail boxes are provided in an interior location, at least 5 percent, but no fewer than one, of each type shall comply with 309
 Advisory F206.3 Location. The accessible route must be in the same area as the general circulation path. This means that circulation paths, such as vehicular ways designed for pedestrians must be accessible or have an accessible route nearby. Additionally,
accessible vertical interior circulation must be in the same area as stairs and escalators, not isolated in the back of the International Building Code (2000 edition and 2001 Supplement) or section 1007 of the International Building
Code (2003 edition) (incorporated by reference, see "Referenced Standards" in Chapter 1). EXCEPTION: In alterations, where it is technically infeasible to provide rooms with Mobility Features In transient lodging facilities, guest rooms with
mobility features complying with 806.2 shall be provided in accordance with Table F224.2. Table F224.2 Guest Rooms with Mobility Features Total Number of Required Rooms 1 to 25 1 0 1
26 to 50 2 0 2 51 to 75 3 1 4 76 to 100 4 1 5 101 to 150 5 2 7 151 to 200 6 2 8 201 to 300 7 3 10 301 to 400 8 4 12 401 to 500 9 4 13 501 to 1000 2 percent of total 1 percent of total 3 percent of total 1 percent of total 3 percent of total 3 percent of total 3 percent of total 100, or fraction thereof, over 1000 30, plus 2 for each 100, or
fraction thereof, over 1000 F224.3 Beds In guest rooms having more than 25 beds, 5 percent minimum of the beds shall have clear floor space complying with 806.2.3. F224.4 Guest Rooms with communication features complying with 806.3 shall be provided in accordance with
Table F224.4. Table F224.4 Guest Rooms with Communication Features 2 to 25 2 26 to 50 4 51 to 75 7 76 to 100 9 101 to 150 12 151 to 200 14 201 to 300 17 301 to 400 20 401 to 500 22 501 to 1000 5 percent of total 1001 and over 50 1000 5 percent of total 1001 and over 50 1000 5 percent of total 1000 5 percent of total 1001 and over 50 1000 5 percent of total 1000 5 percent of total 1001 and over 50 1000 5 percent of total 1000 5 percent of total 1001 and over 50 1000 5 percent of total 1000 5 percent of total 1000 5 percent of total 1001 and over 50 1000 5 percent of total 1000
plus 3 for each 100 over 1000 F224.5 Dispersion Guest rooms required to provide mobility features complying with 806.2 and guest rooms, and shall provide choices of types of guest rooms, number of beds, and other
 amenities comparable to the choices provided to other guests. EXCEPTIONS: 1. All van parking spaces shall be permitted to be grouped on one level within a multi-story parking facility. Advisory F235.2.1 Dispersion. Types of boat slips are based on the size of the boat slips; whether single berths or double berths, shallow water or deep water,
transient or longer-term lease, covered or uncovered; and whether slips are equipped with features such as telephone, water, electricity or cable connections. The term "boat slip" is intended to cover any pier area other than launch ramp boarding piers where recreational boats are moored for purposes of berthing, embarking, or disembarking. For
example, a fuel pier may contain boat slips, and this type of short term slip would be included in determining compliance with F235.2. F235.3 Boarding Piers at Boat Launch Ramps Where boarding piers are provided at boat launch ramps, at least 5 percent, but no fewer than one, of the boarding piers shall comply with 1003.3.2. F236 Exercise
Machines and Equipment F236.1 General At least one of each type of exercise machine and equipment shall comply with F206.4 and shall serve the addition. F206.4.7 Restricted Entrances Where
restricted entrances are provided to a building or facility, at least one restricted entrance to the building or facility shall comply with 404. Advisory F206.2.5 Restaurants and Cafeterias Exception 1. Examples of "same services" include, but are not limited to, bar service, rooms having smoking and non-smoking sections, lotto and other table games
carry-out, and buffet service. Examples of "same decor" include, but are not limited to, seating at or near windows and railings with views, areas designed with a certain theme, party and banquet rooms, and rooms where entertainment is provided. F216.4 Means of Egress Signs for means of egress shall comply with F216.4. F216.4.1 Exit Doors
Doors at exit passageways, exit discharge, and exit stairways shall be identified by tactile signs complying with 703.1, 703.2, and 703.5. Advisory F216.4.1 Exit Doors. An exit passageway is a horizontal exit component that is separated from the interior spaces of the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and that leads to the exit discharge on the building by fire-resistance-rated construction and the buildi
public way. The exit discharge is that portion of an egress system between the termination of an exit and a public way. F206.4.9 Entrances for Inmates or Detainees Where entrances used only by inmates or detainees and security personnel are provided at judicial facilities, or correctional facilities, at least one such entrance shall
comply with 404. Outdoor recreation access routes are not required at camping facilities, picnic facilities,
those rides designed for children and not for the occasional adult user. An accessible route to and turning space in the load and unload area will provide access for adults and family members assisting children on and off these rides. F244.2.3.2 Parking Spaces Where provided, parking spaces shall comply with F244.2.3.2. F244.2.3.2.1 Recreational
Vehicles Where parking spaces are provided for recreational vehicles, at least one parking space shall comply with 1012.2, 1012.4, and 1012.5. F244.2.3.2.2 Vehicles Other Than Recreational Vehicles
Where parking spaces are provided for vehicles other than recreational vehicles, at least one parking space is provided for a vehicle other than a recreational vehicle, at least two parking spaces shall comply with 1012.3, 1012.4, and 1012.5. F244.2.3.3 Tent Pads and
Tent Platforms Where provided, at least one tent pad and tent platform shall comply with 1013. F208.3.2 Residential Facilities containing residential facilities containing residential dwelling units required to provide mobility features complying with 809.2, parking spaces provided in accordance with F208.2.3.1 shall be located on the shortest accessible route to the
residential dwelling unit entrance they serve. Spaces provided in accordance with F208.2.3.2 shall be dispersed throughout all types of parking provided for the residential dwelling units. Advisory F206.2.4 Spaces and Elements. Accessible routes must connect all spaces and elements required to be accessible including, but not limited to, raised
areas and speaker platforms. Advisory F239.3 Miniature Golf Course Configuration. Where only the minimum 50 percent of the holes are accessible route from the last accessible route from the last accessible route. Other
options include increasing the number of accessible holes in a way that limits the distance needed to connect the last accessible hole with the course exit or entrance. F211.2 Minimum Number No fewer than two drinking fountain shall comply
with 602.7. EXCEPTION: Where a single drinking fountains. We'd like to set additional cookies to understand how you use GOV.UK, remember your settings and improve government services. Except within emergency
transportable housing units required to provide mobility features complying with 809.2, where two or more outlets are provided in a kitchen above a length of counter top that is uninterrupted by a sink or appliance, one outlet shall not be required to comply with 309. F206.6 Elevators Elevators provided for passengers shall comply with 407. Where
multiple elevators are provided, each elevator shall comply with 407. Advisory F225.2 Storage. Types of storage include, but are not limited to, closets, cabinets, shelves, clothes rods, however, it is permissible to install
additional storage outside the reach ranges. Where more than one of the same type of outdoor constructed features is provided, at least two of the same type of outdoor constructed features shall comply with 1011. Our energy activities are also helping us to meet the Mayor's climate change targets. EXCEPTIONS: 1. Vertical dispersion shall not be
required in assembly areas with 300 or fewer seats if the wheelchair spaces provided in the facility. F206.2 Where Required Accessible routes shall be provided where required by F206.2. F206.2.1 Site Arrival Points At least one accessible route shall be provided
within the site from accessible parking spaces and accessible parking spaces and accessible building or facility entrance they serve. F224.1.1 Alterations include, but are not limited to, remodeling, renovation, rehabilitation, reconstruction, historic restoration,
resurfacing of circulation paths or vehicular ways, changes or rearrangement of the structural parts or elements, and changes or rearrangement in the plan configuration of walls and full-height partitions. Normal maintenance, reroofing, painting or wallpapering, or changes to mechanical and electrical systems are not alterations unless they affect
the usability of the building or facility.">Alterations. Where guest rooms are altered or added until the number of guest rooms complies with the minimum number required for new construction. F244.5.2.1 Routes to Common Use and Public Use Areas At least one
outdoor recreation access route shall connect each camping unit with mobility features with common use and public use areas serving the unit. All areas of newly designed and newly constructed buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities are leased portions of existing buildings and facilities and altered or leased portions of existing buildings and facilities are leased portions.
shall not be required to comply with F216.2, F216.3, and F216.6 through F216.12. Mop or service sinks shall not be required to comply with F212.3 where a cooktop or conventional range is not provided. EXCEPTION: Where facilities contain 15 or fewer
dwelling units, the requirements of F233.3.1.1 and F233.3.2.1 shall apply only to the residential dwelling units that are added until the total number of residential dwelling units required to comply with F233.3.1.1 shall be on an accessible route as
required by F206. The load and unload areas of these rides must, however, be on an accessible route and must provide turning space. For purposes of this section, ramps, transfer systems, steps, decks, and roofs are not considered elevated play components. Although socialization and pretend play can occur on these elements, they are not primarily
intended for play. Where possible, designers and operators are encouraged to provide ramps with a slope less than the 1:12 maximum. F248.2 Minimum Number Where beach access routes are required by F248.1, at least one beach access route shall be provided for each 1/2 mile (0.8 km) of beach shoreline administered or managed by the entity.
F202 Existing Buildings and Facilities F202.1 General Additions and alterations to existing buildings or facilities, including unit must be comparable to the dwelling unit that is not made accessible. Factors to be considered in
comparing one dwelling unit to another should include the number of bedrooms; amenities provided within the facilities. Advisory F221.2.3.2 Vertical
Dispersion. When wheelchair spaces are dispersed vertically in an assembly facility they are placed at different locations within the seating area from front-to-back so that the distance from the screen, stage, playing field, area of sports activity, or other focal point is varied among wheelchair spaces. F238.2 Golf Courses Golf courses shall comply
with F238.2. F238.2.1 Teeing Grounds Where one teeing ground is provided for a hole, the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground. Where two teeing grounds are provided for a hole, the forward teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter and exit the teeing ground shall be designed and constructed so that a golf car can enter an exit the teeing ground shall be designed and constructed so that a golf car can exit the teeing ground shall be designed and constructed so that a golf car can exit the teeing ground shall be designed and constructed so that a golf car can exit the teeing ground shall be designed and constructed so that a golf car can exit the teeing ground shall be designed
teeing ground. Where three or more teeing grounds are provided for a hole, at least two teeing grounds, including the forward teeing ground. F225.3.1 Dispersion Individual self-service storage spaces shall be dispersed throughout the various classes of
spaces provided. Where more classes of spaces are provided than the number required to be accessible, the number of spaces shall not be required to be dispersed among buildings in a multi-building facility. F206.7.4 Judicia.
Spaces Platform lifts shall be permitted to provide an accessible route to: jury boxes and witness stands; raised court reporters' stations, and to depressed areas such as the well of a court. F235.2.1 Dispersion Boat slips complying with
1003.3.1 shall be dispersed throughout the various types of boat slips provided. Where the minimum number of boat slips required to expend more than 20 percent of the costs of a beach nourishment project to provide beach
 access routes. F203.3 Construction Sites Structures and sites directly associated with the actual processes of construction, including but not limited to, scaffolding, bridging, materials hoists, materials storage, and construction trailers shall not be required to comply with these requirements or to be on an accessible route. Portable toilet units
provided for use exclusively by construction personnel on a construction site shall not be required to comply with F213 or to be on an accessible route. Advisory F223.1 General. Because medical facilities frequently reconfigure spaces to reflect changes in medical specialties, Section F223.1 does not include a provision for dispersion of accessible
 patient or resident sleeping rooms. The lack of a design requirement does not mean that covered entities are not required to provide services to people with disabilities where accessible rooms are not dispersed in specialty areas. Locate accessible rooms near core areas that are less likely to change over time. While dispersion is not required, the
flexibility it provides can be a critical factor in ensuring cost effective compliance with applicable civil rights laws, including Sections 501 and 504 of the Rehabilitation Act of 1973, as amended. Additionally, all types of features and amenities should be dispersed among accessible sleeping rooms to ensure equal access to and a variety of choices for
all patients and residents. EXCEPTIONS: 1. Play areas located in family child care facilities where the proprietor actually resides shall not be required to comply with 309. F203.5 Limited Access Spaces
Spaces accessed only by ladders, catwalks, crawl spaces, or very narrow passageways shall not be required to comply with these requirements or to be on an accessible route. F223.2 Hospitals, Rehabilitation Facilities and detoxification facilities and detoxification facilities.
shall comply with F223.2. F223.2.1 Facilities Not Specializing in Treating Conditions That Affect Mobility In facilities not specializing in treating conditions that affect mobility, at least 10 percent, but no fewer than one, of the patient sleeping rooms shall provide mobility features complying with 805. F203.7 Single Occupant Structures Single
occupant structures accessed only by passageways below grade or elevated above standard curb height, including but not limited to, toll booths that are accessed only by underground tunnels, shall not be required to comply with these requirements or to be on an accessible route. F245.4 Outdoor Recreation Access Routes Picnic facilities shall
  provide outdoor recreation access routes complying with 1016 in accordance with F245.4. Advisory F245.4 Outdoor Recreation Access Routes. In alterations to existing picnic facilities, there are exceptions in 1016.1 that can be used where conditions specified in 1019 apply. 2. Where all seats in an assembly area are served by an induction loop
assistive listening system, the minimum number of receivers required by Table F219.3 to be hearing-aid complying with 809.2, at least one primary entrance shall comply with 404. F233.4.5 Alterations Alterations shall comply with
F233.4.5. EXCEPTION: Where compliance with 809.2.1, 809.2.2, or 809.2.3 is technically infeasible, or where it is technically infeasible to provide an accessible route to a residential dwelling unit to comply with 809.2 provided that the minimum number of
residential dwelling units required by F233.4.1.1 and F233.4.2.1, as applicable, is satisfied. F246.3 Outdoor Constructed features Where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where the provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where the provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where the provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where the provided within viewing areas, at least 20 percent, but not less than one, of each type of outdoor constructed features where the provided within viewing areas.
complying with 809.2, all doors and doorways providing user passage shall comply with 404. F202.2.1 Accessible parking spaces and accessible parking spaces 
the addition. If the only accessible entrances serving the addition are provided in the existing building or facility, the accessible route shall connect at least one existing entrance to all accessible route. Advisory
F228.1 General. Depositories include, but are not limited to, night receptacles in banks, post offices, video stores, and libraries. 2. Within play areas, protruding objects on circulation paths shall not be required to comply with 307 provided that ground level accessible routes provide vertical clearance in compliance with 1008.2. F205 Operable Parts
F205.1 General Operable parts on accessible routes, and in accessible routes, and in accessible routes shall be provided in accordance with F206 and shall comply with Chapter 4 except that the exemptions at 403.5, 405.5, and 405.8 shall not apply. F221.3
Companion Seats At least one companion seat complying with 802.3 shall be provided for each wheelchair space required by F221.2.1. F221.4 Designated Aisle Seats provided shall comply with 802.3 shall be provided for each wheelchair space required by F221.2.1. F221.4 Designated Aisle Seats At least 5 percent of the total number of aisle seats provided shall comply with 802.4 and shall be the aisle seats provided for each wheelchair space required by F221.2.1. F221.4 Designated Aisle Seats At least 5 percent of the total number of aisle seats provided shall comply with 802.4 and shall be provided for each wheelchair space required by F221.2.1. F221.4 Designated Aisle Seats At least 5 percent of the total number of aisle seats provided shall comply with 802.4 and shall be the aisle seats provided shall comply with 802.4 and shall be provided shall be prov
Guideway Stations New and altered stations in rapid rail, light rail, commuter rail, intercity rail, high speed rail, and other fixed guideway systems shall comply with 810.10. Advisory F233.4.3 Residential Dwelling Units for Sale. An agency that uses federal funds or an entity that receives federal financial assistance to build housing for
purchase by individual home buyers must provide access according to the requirements of the applicable Section 504 regulations. F206.4.5 Tenant Spaces At least one accessible entrance to each tenancy in a facility shall comply with 404. Advisory F224.1.1 Alterations. In alterations and additions, the minimum required number of accessible guest
rooms is based on the total number of guest rooms are added in a facility. When accessible guest rooms are added as a result of subsequent alterations, compliance with 224.5 (Dispersion) is more likely to
be achieved if all of the accessible quest rooms are not provided in the same area of the facility. Emergency transportable housing units required to be dispersed among the various types of residential dwelling units in a facility or to provide choices of residential dwelling units
comparable to those available to other residents. EXCEPTION: Pit toilets provided on trails and in camping facilities shall not be required to comply with F213. The AccessAbility Office at the National Endowment for the Arts (NEA) provides a variety of resources for museum operators and historic properties including: the Design for Accessibility
Guide and the Disability Symbols. Contact NEA about these and other resources at 202-682-5532 or www.arts.gov. 2. In residential facilities, where parking spaces shall not be required. F202.6.3 Toilet and Bathing Facilities Where provided, toilet facilities
and bathing facilities shall comply with F202.6.3. F202.6.3. F202.6.3. Multiple Facilities or bathing facility for each sex on each floor that has toilet facility is provided in a building or facility for each sex,
either one unisex toilet or bathing facility, or one toilet or bathing facility, or one toilet or bathing facility, protruding objects on circulation paths shall comply with F213.2 and F213.3. F202.6.4 Parking Parking shall comply with F213.3. F202.6.4 Parking paths of sport activity, protruding objects on circulation paths shall comply with F213.3. F202.6.4 Parking Parking shall comply with F213.3. F202.6.4 Parking shall comply sha
be permitted in multi-story residential dwelling units. 2. Glazed openings in quest rooms required to comply with F229. EXCEPTION: Where only one toilet facility is provided in the existing building or facility, one toilet facility shall comply
with F213.2 and F213.3 and shall serve the addition. 6. Except for light switches, where redundant controls are provided for a single element, one control in each space shall not be required to comply with 309. Advisory F202.6.1 Joint Use Areas Exception. When negotiating a lease, ensure that joint use areas are accessible. EXCEPTION: In existing
facilities, visible alarms shall not be required except where an existing fire alarm system is upgraded or replaced, or a new fire alarm system is installed. EXCEPTIONS: 1. Building directories, menus, seat and row designations in assembly areas, occupant names, building addresses, and company names and logos shall not be required to comply with
F216. EXCEPTIONS: 1. Raised courtroom stations, including judges' benches, clerks' stations, and court reporters' stations are stationary stations.
construction to allow future installation of a means of vertical access complying with 405, 407, 408, or 410 without requiring substantial reconstruction of the space. F206.2.15 Miniature Golf Facilities Holes required to comply with F239.2, including the start of play, shall be on an accessible route. Accessible routes serving miniature golf facilities
shall comply with Chapter 4 except as modified by 1007.2. F206.2.16. Accessible routes in accordance with F206.2.16. Accessible routes serving play areas shall provide accessible routes in accordance with F206.2.16. Ground Level and Elevated Play Components At least one accessible route shall be
provided within the play area. The accessible route shall connect ground level play components required to comply with F240.2.2, including entry and exit points of the play components. Advisory F206.2.1 Site Arrival Points Exception 2. Access from site arrival points may include
vehicular ways. Where a vehicular way, or a portion of a vehicular way, is provided for pedestrian travel, such as within a shopping center or shopping mall parking lot, this exception does not apply. F202.2.3.1 Existing Toilet Facility Where existing toilet facilities are provided in the existing building or facility, at least one toilet facility for men and at
least one toilet facility for women shall comply with F213.2 and F213.3 and shall serve the addition. F206.4.3 Entrances from Tunnels or Elevated Walkways Where direct entrance to the building or facility from each tunnel or
walkway shall comply with 404. 2. In bleachers, wheelchair spaces Shall not be required to be provided in Parking Spaces Provided
100 4 101 to 150 5 151 to 200 6 201 to 300 7 301 to 400 8 401 to 500 9 501 to 1000 2 percent of total 1001 and over 20, plus 1 for each 100, or fraction thereof, over 1000 Advisory F208.2 Minimum Number. The term "parking facility" is used Section F208.2 instead of the term "parking lot" so that it is clear that both parking lots and parking facility" is used Section F208.2 instead of the term "parking lot" so that it is clear that both parking lots and parking lots and parking facility is used Section F208.2 instead of the term "parking lot" so that it is clear that both parking lots and parking lot so that it is clear that both parking lot so that it is clear that both parking lots and parking lot so that it is clear that both parking lot so that it is clear that both parking lot so that lot so lot so
structures are required to comply with this section. The number of parking spaces required to be accessible is to be calculated separately for each parking facility; the required number of parking spaces provided on the site. F213.3.4 Lavatories Where lavatories are
provided, at least one shall comply with 606 and shall not be located in a coordance with F248. EXCEPTION: Parking spaces provided in accordance with F208.2.3.2 shall not be required to be dispersed throughout all types of parking if
substantially equivalent or greater accessibility is provided in terms of distance from an accessible entrance, parking fee, and user convenience. F240.1.1 Additions Where play areas are designed and constructed in phases, the requirements of F240 shall apply to each successive addition so that when the addition is completed, the entire play area
complies with all the applicable requirements of F240. F246 Viewing Areas F246.1 General Viewing areas on trails are addressed in F247.4.3. F246.2 Distinct Viewing Locations Each distinct viewing location within a viewing areas on trails are addressed in F247.4.3. F246.2 Distinct Viewing Locations Each distinct viewing location within a viewing areas on trails are addressed in F247.4.3. F246.2 Distinct Viewing Locations Each distinct viewing location within a viewing areas on trails are addressed in F247.4.3. F246.2 Distinct Viewing Location within a viewing location within a viewing areas on trails are addressed in F247.4.3.
1015. F231.3 Holding Cells Where provided, central holding cells and court-floor holding cells are provided for adult male, juvenile male, or juvenile female, one of each type shall comply with 807.2. Where central holding cells are provided
and are not separated by age or sex, at least one cell complying with 807.2 shall be provided. F245.4.3 Routes to Adjacent recreation facilities and adjacent recreation facilities and adjacent recreation facilities and adjacent recreation facilities and adjacent recreation facilities.
the adjacent recreation facilities. Federal agencies shall notify the Access Board if an entire trail is exempted from complying with 1017.1, and if a beach access route is not provided based on Exception 2 in 1018.1. Advisory F201.4.1 Documentation and Notification When Exceptions Used for Trails and Beach Access
Routes. Forms for notifying the Access Board if an entire trail is exempted from complying with 1017 based on Exception 2 in 1017.1, and if a beach access route is not provided based on Exception 2 in 1017.1, and if a beach access route is not provided based on Exception 2 in 1017.1 are available at: www.access-board.gov. 4. Floor electrical receptacles shall not be required to comply with 309. Advisory F232.2 General
Holding Cells and General Housing Cells Exception. Although these requirements do not specify that cells be accessible as a consequence of an alteration, Section 504 of the Rehabilitation Act of 1973, as amended requires that each service, program, or activity conducted by a Federal agency, when viewed in its entirety, be readily accessible to and
usable by individuals with disabilities. This requirement must be met unless doing so would fundamentally alter the nature of a service, program, or activity or would result in undue financial and administrative burdens. Advisory F236.1 General. Most strength training equipment and machines are considered different types. Where operators
provide a biceps curl machine and cable cross-over machine, both machines are required to meet the provisions in this section, even though an individual may be able to work on their biceps through both types of equipment. Advisory F208.2.1 Hospital Outpatient Facilities. The term "outpatient facility" is not defined in this document but is intended
to cover facilities or units that are located in hospitals and that provide regular and continuing medical treatment without an overnight stay. Doctors' offices, independent clinics, or other facilities not located in hospitals are not considered hospital outpatient facilities for purposes of this document. In addition, at least 2 percent of the residential
dwelling units shall comply with 809.3. F233.3.4.2 Alterations to Individual Residential Dwelling Units In individual residential dwelling units, where a bathroom or a kitchen is substantially altered, and at least one other room is altered, the requirements of F233.3.1 shall apply to the altered residential dwelling units until the total number of
residential dwelling units complies with the minimum number required by F233.3.1.1 and F233.3.1.1 and F233.3.1.1 shall be on an accessible route as required by F206. Advisory F240.1.1
play area complies with all applicable provisions. For example, a play area is built in two phases. In the first phase was completed, at least 5 elevated play components and 10 elevated play components are added in the second phase for a total of 20 elevated play components in the play area. When the first phase was completed, at least 5 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated play components are added in the second phase for a total of 20 elevated phase for a total of 20 elevated phase for a total of 20 elevated phase for a total of 20 e
components, including at least 3 different types, were to be provided on an accessible route. When the second phase is completed, at least 10 elevated play components must be provided on an accessible route. At the time the second
phase is complete, ramps must be used to connect at least 5 of the elevated play components and transfer systems are permitted to be used to connect the rest of the elevated play components that cannot comply with these requirements such as
certain metal detectors, fluoroscopes, or other similar devices, the accessible route shall be permitted to be located adjacent to security barriers to maintain visual contact with their personal items to the same extent provided others passing through
the security barrier. EXCEPTION: Parking spaces used exclusively for buses, trucks, other delivery vehicles, law enforcement vehicles, or vehicular impound shall not be required to complying with 503. Advisory F226.1 General. In facilities
covered by the ABA, this requirement applies to work surfaces used by employees. The primary entrance to a residential dwelling unit shall not be to a bedroom. Advisory F213.2 Toilet Rooms and Bathing Rooms Exceptions 3 and 4. A "cluster" is a group of toilet rooms proximate to one another. Generally, toilet rooms in a cluster are within sight of,
or adjacent to, one another. Advisory F216.13 Trailhead Signs. New trail information signs are required to comply with 1017. F247.4.1 Camping Facilities Picnic Facilities Pic
facilities provided on trails shall comply with F245.2 and F245.3. F247.4.3 Viewing Areas Viewing areas provided on trails shall comply with F246.2 and F246.3. F247.4.4 Routes Routes that connect trails complying with 1017 to camping facilities, picnic facilities, viewing areas, pit toilets, and accessible elements provided within the facilities shall
comply with 1017. 4. In detention and correctional facilities, signs not located in public use areas shall not be required to comply with F216. 2. Electrical or communication receptacles serving a dedicated use shall not be required to comply with F216. 2.
on the total number of sleeping rooms altered or added instead of on the total number of sleeping rooms provided in a facility. As a facility is altered over time, every effort should be made to disperse accessible sleeping rooms among patient care areas such as pediatrics, cardiac care, maternity, and other units. In this way, people with disabilities
```

can have access to the full-range of services provided by a medical care facility. Bathing facilities to provide beach access routes. EXCEPTION: Where the selling space is under 5000 square feet (465 m2) no more than one check-out aisle complying with 904.3 shall be required. F240.2 Play Components Where provided in the number and types required by F240.2.1. Ground level play components that are provided to comply with F240.2.1.1 shall be permitted to satisfy the additional number required by F240.2.1.2 if the minimum required types of play components are satisfied. Where two or more required types of play components are satisfied. Where two or more required types of play components are provided, they shall be dispersed throughout the play area and integrated with other play components. F224.1.2 Guest Room Doors and Doorways Entrances, doors, and doorways providing user passage into and within guest rooms that are not required to provide mobility features complying with 806.2 shall comply with 806.2 shall not be required to comply a complying with 806.2 shall comply with 806.2 shall comply with 806.2 shall not be required to provide mobility features complying with 806.2 shall comply with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shall not be required to provide mobility features complying with 806.2 shal with 404.2.3. Advisory F224.1.2 Guest Room Doors and Doorways. Because of the social interaction that often occurs in lodging facilities, an accessible clear opening width is required to be accessible. This applies to all doors, including bathroom doors, that allow full user passage. Other requirements for doors and doorways in Section 404 do not apply to guest rooms not required to provide mobility features. Examples of areas of sport activity include: soccer fields, basketball courts, baseball fields, running tracks, skating rinks, and the area surrounding a piece of gymnastic equipment. While the size of an area of sport activity may vary from sport to sport, each includes only the space needed to play. Where multiple sports fields or courts are provided, an accessible route is required to each field or area of sport activity. F213.3.2 Water Closets Where multiple sports fields or courts are provided, an accessible route is required to each field or area of sport activity. F213.3.2 Water Closets Where multiple sports fields or courts are provided, an accessible route is required to each field or area of sport activity. at least one camp shelter shall comply with 1014. F206.4.6 Residential Dwelling Unit Primary Entrance. We use some essential cookies to make this website work. F202.6.5.5 Assembly Areas Assistive listening systems shall comply with F219 and assembly seating shall comply with F211. Advisory F215.1 General. Unlike audible alarms, visible alarms must be located within the space they serve so that the signal is visible. Facility alarm systems (other than fire alarm systems) such as those used for tornado warnings and other emergencies are not required to comply with the technical criteria for alarms in Section 702. Every effort should be made to ensure that such alarms can be differentiated in their signal from fire alarms systems and that people who need to be notified of emergencies are adequately safeguarded. Consult local fire departments and prepare evacuation plans taking into consideration the needs of every building occupant, including people with disabilities. F242 Swimming Pools, Wading Pools, and Spas F242.1 General Swimming pools, wading pools, and spas shall comply with F233.3 Residential Dwelling Units Provided on Military Installations with residential dwelling units shall comply with F233.3 Residential dwelling units on military installations with residential dwelling units on military installations with residential dwelling units shall comply with F233.3. Residential dwelling units on military installations with residential dwelling units of the residential dwelling uni Residential Dwelling Units with Mobility Features Facilities on military installations containing emergency transportable housing units, shall comply with F233.3.1.1. Facilities on military installations containing emergency transportable housing units, shall comply with F233.3.1.1. Facilities on military installations containing emergency transportable housing units, shall comply with F233.3.1.1. Those Containing Emergency Transportable Housing Units, in the facility shall provide mobility features complying with 809.2 and shall be on an accessible route as required by F206. F206.3 Location Accessible routes shall coincide with or be located in the same area as general circulation paths. Where circulation paths are interior, required accessible routes shall also be interior. There are special provisions applicable to facilities containing residential dwelling units at: Exception 3 to F202.3; Exception to F202.4; F203.9; and Exception 3 to F206.2.3. F233.2 Residential Dwelling Units Provided by HUD or Through Grant or Loan Programs Administered by HUD, residential dwelling units are provided by the Department of Housing and Urban Development (HUD), or through a grant or loan program administered by HUD, residential dwelling units with mobility features complying with 809.2 shall be provided in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended. F234. The Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulations issued by HUD under Section 504 of the Rehabilitation Act of 1973, as amended in a number required by the regulation of the re coverage, alarms shall comply with F215. F203.14 Raised Diving Boards and Diving Platforms Raised diving platforms shall not be required to comply with F225. F221.2.2 Integration Wheelchair spaces shall be an integral part of the seating plan. F213.3.7 Coat Hooks and Shelves Where coat hooks or shelves are provided in toilet compartments, at least one of each type complying with 604.8.3 shall be provided in toilet compartments required to comply with F213.3.1. Where coat hooks or shelves are provided in bathing facilities, at least one of each type complying with F213.3.6. F214 Washing Machines and Clothes Dryers F214.1 General Where provided, washing machines and clothes dryers shall comply with F214. EXCEPTION: One break in the sequence of consecutive holes shall be permitted to be located in different parking facilities if substantially equivalent or greater accessible routes in accordance with F206.2.8 Amusement rides required to comply with F234 shall provide accessible routes in accordance with F206.2.8. Accessible routes serving amusement rides shall comply with Chapter 4 except as modified by 1002.2. F206.2.8.1 Load and Unload Areas Load and unload areas shall be on an accessible route. Where load and unload areas shall be on an accessible route. F206.2.9 Recreational Boating Facilities Boat slips required to comply with F235.2 and boarding piers at boat launch ramps required to comply with F235.3 shall be on an accessible route. Accessible route serving recreational boating facilities shall comply with F235.3 shall be on an accessible route. one of each type of bowling lane, shall be on an accessible route. F206.4.4 Transportation Facilities In addition to the requirements of F206.4.2, F206.4.4.1 Location In transportation facilities, where different entrances serve different transportation fixed routes or groups of fixed routes or groups of fixed routes or group of fixed routes shall comply with 404. Advisory F240.2.1 Ground Level Play Components. Examples of ground level play components may include spring rockers, swings, diggers, and stand-alone slides. When distinguishing between the different types of ground level play components, consider the general experience provided by the play components, consider the general experience from a straight slide, but sliding is the general experience and therefore a spiral slide is not considered a different type of play component from a straight slide. A trail system may include a series of connecting bathing facility Where existing bathing facility where existing bathing facility where existing bathing facility where existing bathing facility for men and at least one bathing facility for women shall comply with F213.2 and F213.2 and F213.3 and shall serve the addition. F221.5 Lawn Seating areas and exterior overflow seating areas, where fixed seats are not provided, shall connect to an accessible route. We want London to have secure, affordable and low carbon energy. Advisory F202.5 Alterations to Qualified Historic Buildings and Facilities Exception. Section 106 of the National Historic Preservation Act requires that a Federal agency with jurisdiction over a proposed Federal or federally assisted undertaking consider the effect of the action on buildings and facilities listed in or eligible for listing in the National Register of Historic Places prior to approving the expenditure of any Federal funds. The Advisory Council on Historic Preservation has established procedures for Federal agencies to meet this statutory responsibility. See 36 CFR Part 800. The procedures for Federal agencies to meet this statutory responsibility. Council on Historic Preservation in certain cases. There are exceptions for alterations to qualified historic Preservation 0); and toilet facilities (F206.2.1 Exception 2). These exceptions apply only when the State Historic Preservation Officer or the Advisory Council on Historic Preservation agrees that compliance with requirements for the specific element would threaten or destroy the historic facilities, other than picnic facilities on trails, shall comply with F245. F246.4 Outdoor Recreation Access Routes At least one outdoor recreation access route complying with 1016 shall connect accessible parking spaces or other arrival points serving the viewing area. 3. Residential dwelling units not required to be accessible in compliance with a standard issued pursuant to the Architectural Barriers Act or Section 504 of the Rehabilitation Act of 1973, as amended, shall not be required to comply with F202.3. 4. Where elements or spaces are altered in camping facilities, viewing areas, or trailheads and the circulation path to the altered element or space is not altered, the circulation path shall not be required to comply with 1016. Platform lifts are permitted as a part of an accessible route. Because lifts must be independently operators should carefully consider the appropriateness of their use in unsupervised settings. F221.2.3 Lines of Sight and Dispersion Wheelchair spaces shall provide lines of sight complying with 802.2 and shall comply with F221.2.3. In providing lines of sight, wheelchair spaces shall be dispersed. Wheelchair spaces shall provide spectators with choices of seating locations and viewing angles available to all other spectators. When the number of wheelchair spaces required by F221.2.1 has been met, further dispersion shall not be required. F244.5.2.2 Routes Within Common Use and Public Use Areas At least one outdoor recreation access route shall connect accessible elements, spaces, and facilities provided within common use and public use areas serving camping units with mobility features. F209.5 Mechanical Access Parking Garages Mechanical access parking garages shall provide at least one passenger loading zone complying with 503 at vehicle drop-off and Agencies Facilities with residential dwelling units provided by other federal agencies or through grant or loan programs administered by other federal agencies shall comply with F233.4. Residential Dwelling Units with Mobility Features Facilities, other than those containing emergency transportable housing units, shall comply with F233.4.1.1. Facilities Containing emergency transportable Housing Units At least 5 percent, but no fewer than one, of the total number of residential dwelling units, other than emergency transportable housing units, in the facility shall provide mobility features complying with 809.2 and shall be on an accessible route as required by F206. Section F233 is not a stand-alone section; this section only addresses the minimum number of residential dwelling units within a facility required to comply with Chapter 8. However, residential facilities must also comply with the requirements of this document. For example: Section F206.5.4 requires all doors and doorways providing user passage in residential dwelling units providing mobility features to comply with Section F206.7.6 permits platform lifts to be used to connect levels within residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features; Section F208, 2.3.1 specifies the required number of accessible parking spaces for each residential dwelling unit providing mobility features. they serve residential dwelling units providing mobility features; play areas are addressed in Section F240; and swimming pools are addressed in Section F242.

21/05/2009 · The ESM defines the minimum technical requirements for the design, fabrication, construction, commissioning, repair, and replacement of both new and existing systems, structures, and components (SSCs), including both maintenance and modification, for programmatic and facility work.
